

CAB2U

INTRODUCTION

An example of a technical tool being used to digitize transportation is a taxi booking app. The primary goal of cab booking applications was to make the processes simpler, and they have largely succeeded in doing so. The taxi booking apps' overall process structure is automated and demonstrates a basic management of resources across a range of operations. It is easier to run a taxi booking app than any other specialty for anyone with ideas for enterprise mobility because there are various responsible resources at each end and the tasks are process-oriented rather than dependent on global peers.

The only way to generate income when operating a taxi booking application is through rides. Your revenues rise in direct proportion to how frequently your drivers use the app to transport customers. Without a doubt, the taxi drivers who use the app are what drive the commuters and the company's revenue. They utilize the application's technological response and support to generate income. The drivers directly benefit from the application because they can rely on it to increase their income. Customers can get regular rides at low cost and even cash back.

Several platforms, including Android and iOS, can be used to develop mobile applications. IOS uses swift while Android uses Java. However, simultaneously developing an app for iOS and Android is challenging. Cross-platform languages are utilized to deal with this scenario; "React Native" is the most recent and effective one.

In the market for online mobility services, e-hailing is rapidly expanding. Cab2u offers all functions for its users' convenience. Additionally, it offers options for gender filtering and real-time tracking.

In this project, react native will be used to create an android application for taxi services. Since "React native" is cross-platform software, the main goal of using it is to make the application available for both Android and iOS devices.

IMPLEMENTATION

For the purpose of creating login and registration pages, detailed coding is provided here. Laravel, React Native, and other platforms are very important.

DESIGN IMPLEMENTATION AND RESULTS

The actual live operation of the designed program is referred to as design implementation. The program modules are presented in this section along with descriptions of their functions and deployment options.

FEATURES:

- Map Optimization
- Recent version of react native
- New UI designs
- Car Pooling/ Ride Sharing option (We done powerful shared ride algorithm for you)
- Multiple stops (Customer can multiple destinations in single ride, swap the destinations)
- Zones - (You can draw zones from admin panel)
- Dispatch Module (Admin will create trip, view drivers live locations, view reports, cancel trips etc.)

- Customer subscription module
- Scheduled Booking - (Pick Later)
- Bird View / Live Tracking (Admin will see all the cab live locations from admin panel)
- SOS (Complete sos module integrated and we share customer live locations to sos contacts in emergency situations)
- Commercial module (Our app support both taxi and commercial module)
- Multiple trip types (Daily, Rental, Outstation - one way and rounded, Shared, Delivery)
- Multi Language and RTL
- Responsibility privilege module (You can create multiple roles from admin panel)
- Live Tracking (Live tracking polyline available and you enable and disable using admin panel)
- Driver Tip (Customer can pay tip for drivers at the end of the trip)
- Favorite Locations (Customer can mark favourite locations in map)
- Recent Locations (We suggest to customers past 5 locations)
- Vehicle Categories (You can add all the passenger and commercial vehicles from admin side)
- Promo codes (Fully customized promo code module like redemption, min and max value, assign to particular customer etc.)
- Booking cancellation (We integrated cancel option for both customer and driver app)
- Booking auto assign to driver
- Payment modes (Flutter wave, razor pay, pay stack, stripe)
- ETA (Estimated time arrival)
- Location search (Google location search for both pickup and drop locations)
- Chat (Customer to driver chat available)
- Admin chat (Customer to admin chat available)

- Rating (Rating module we integrated both customer and driver app)
- Real-time time drop locations (We maintained actual pickup, drop locations and final pickup, drop location)
- Push Notifications (Customers and drivers get booking status notifications)
- Driver recharges option from the driver app
- Driver KYC verification
- Driver tutorial and training module
- Dynamic fare management (you can change fare from admin panel anytime)
- Customer in-app wallet option
- Complaint module (Customer can register complaints using application)
- Invoice (Customer will get invoice through mail)
- Tax (You can add multiple taxes from admin panel)
- Auto payment mode selection (At the end of trip system will select payment mode automatically)

CUSTOMER APPLICATION

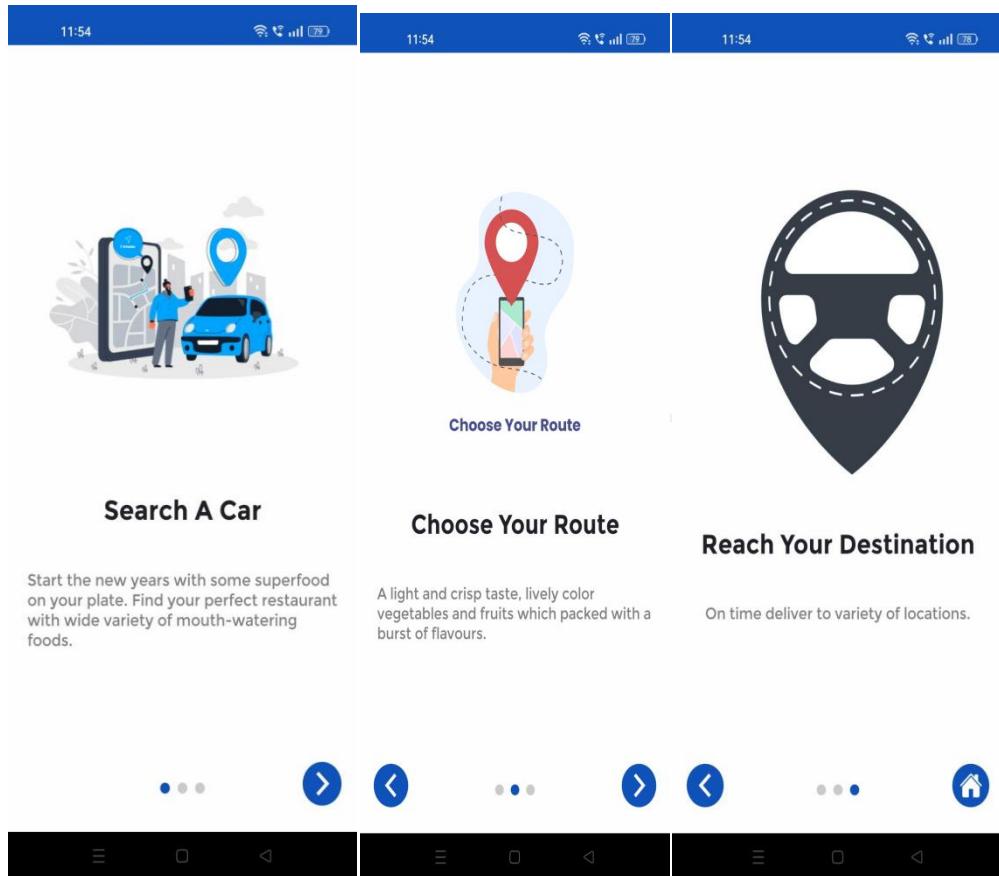

SPLASH SCREEN

For two to three seconds, the splash screen for the customer's Cab2u application will be visible here. Here, your app name and logo will be displayed.

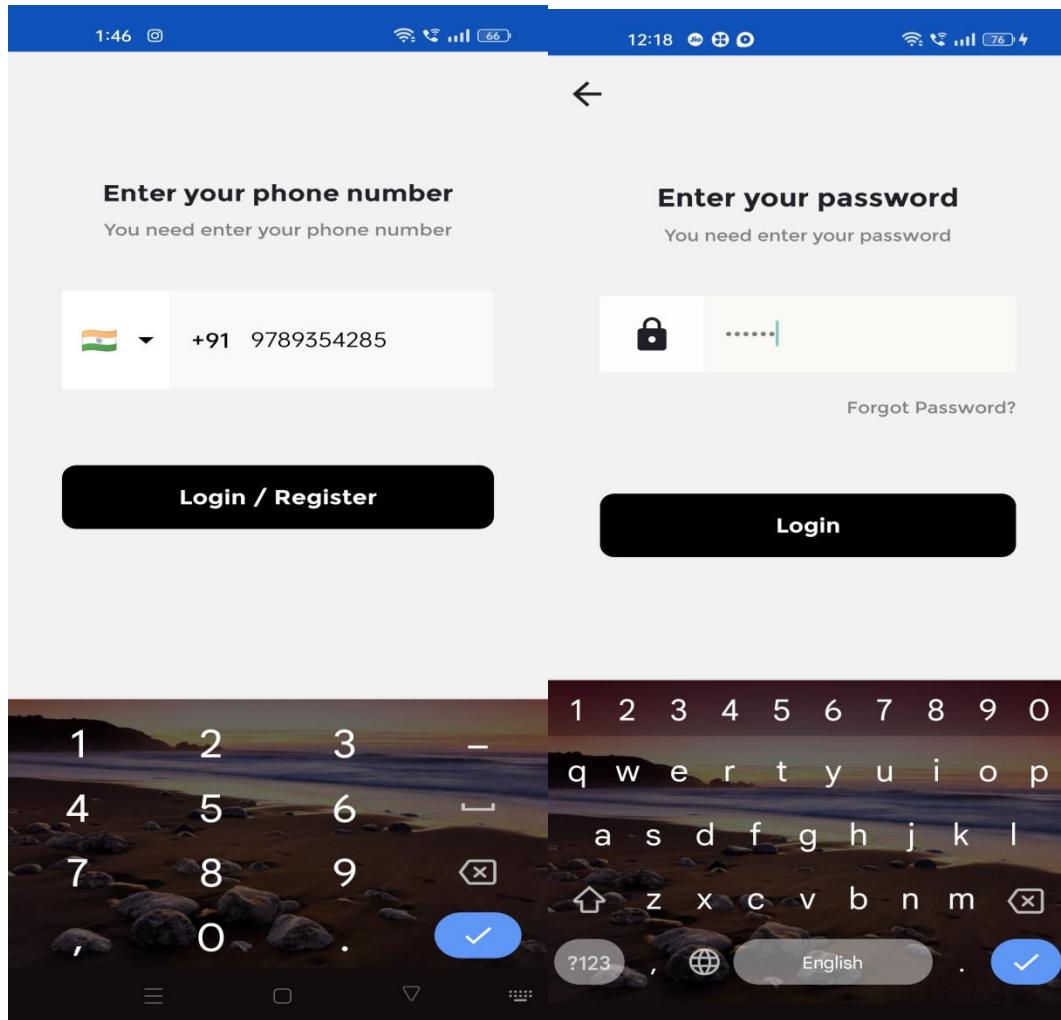

INTRODUCTORY SCREENS

Customer can see these introductory screens which gives introduction to the application, before getting in to the home screen.

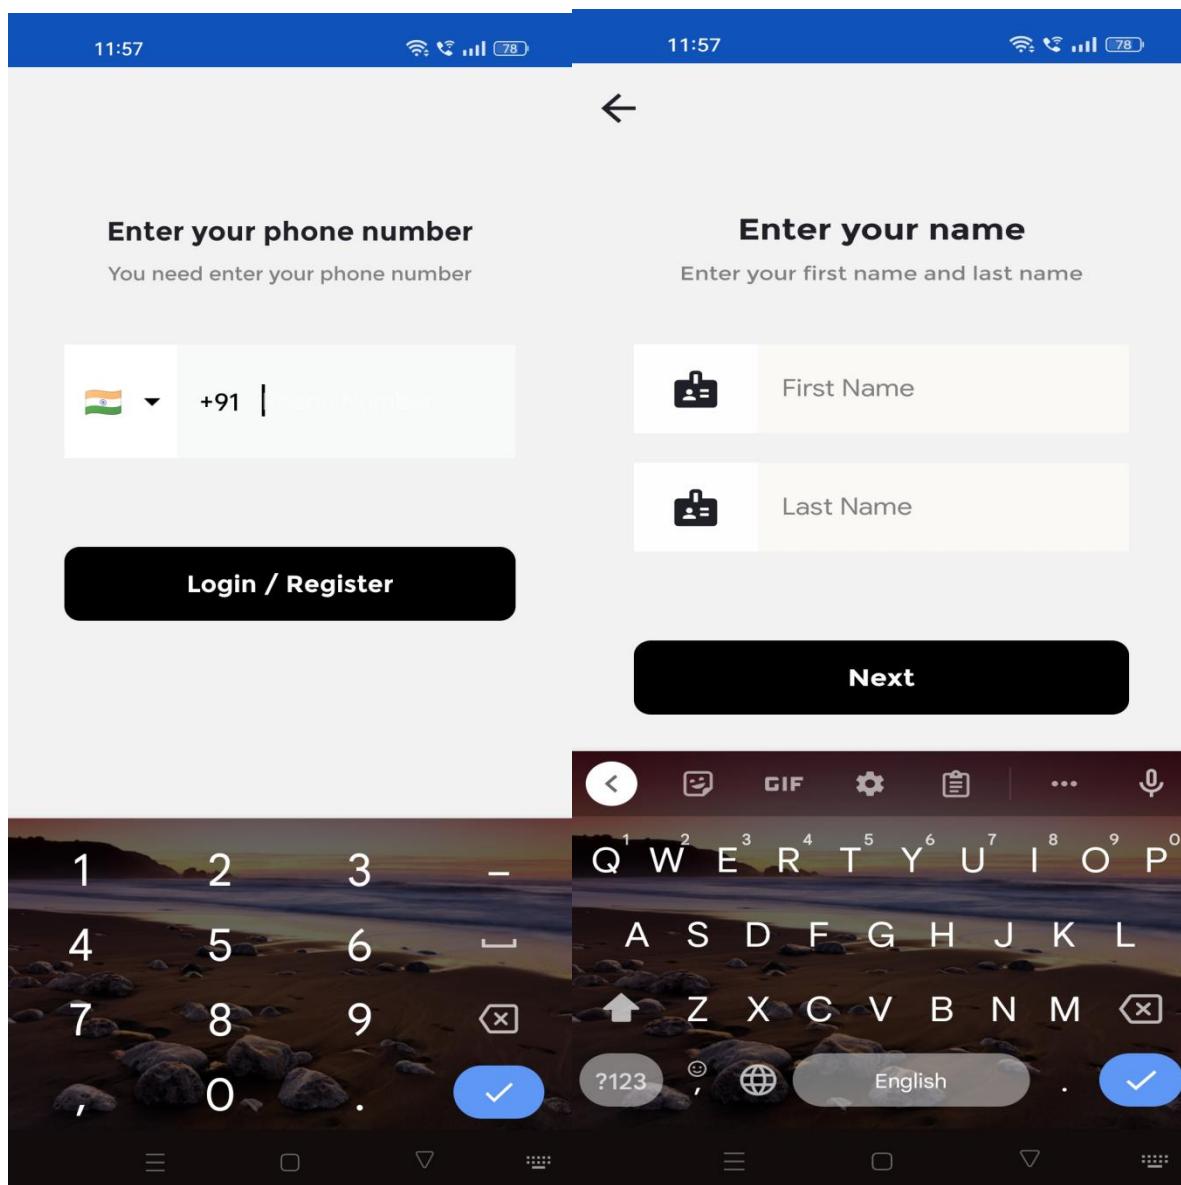

LOGIN

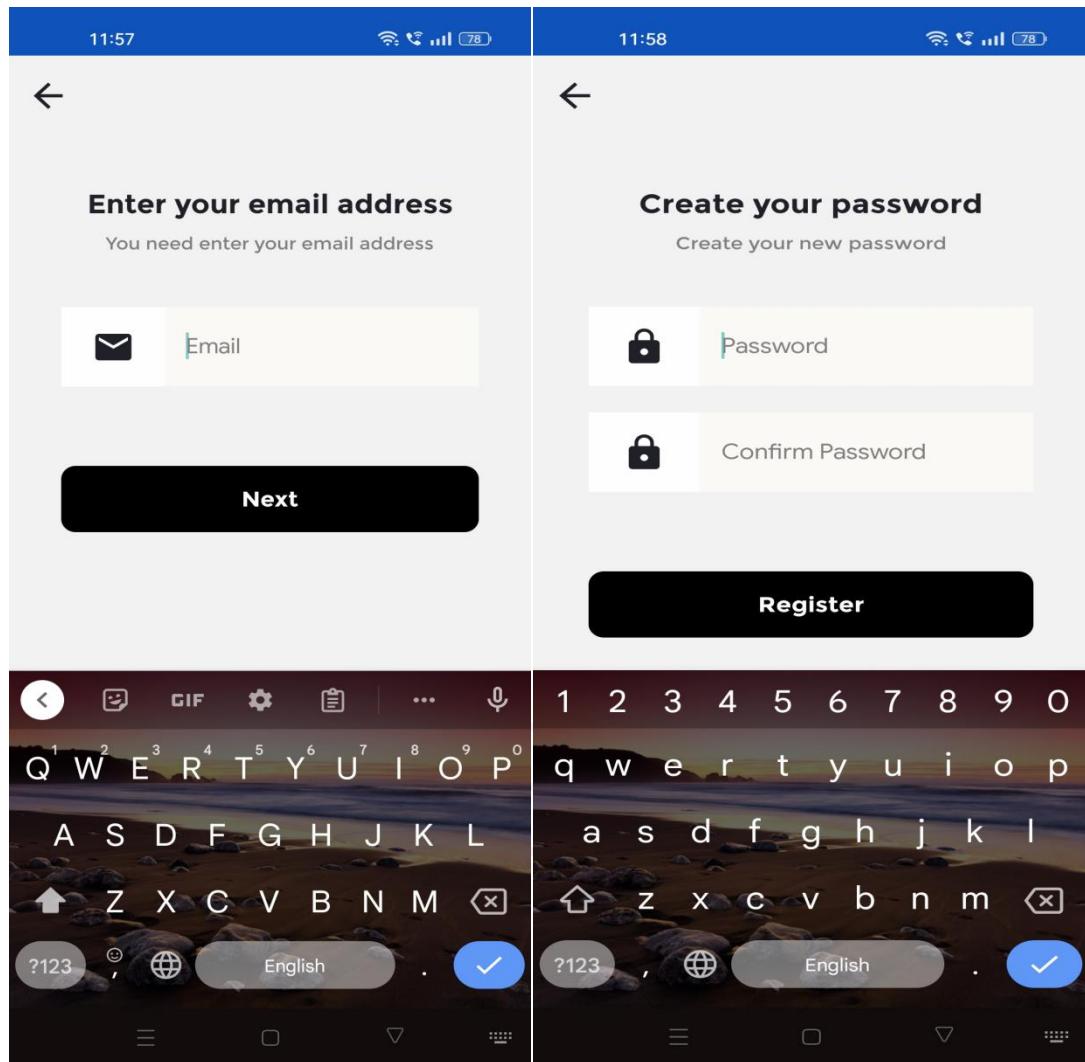

Existing users can access the app from this page by entering their login information, which includes their phone number and password. Additionally, this page has a feature that enables users to maintain their login status even after closing the application.

NEW USER REGISTER

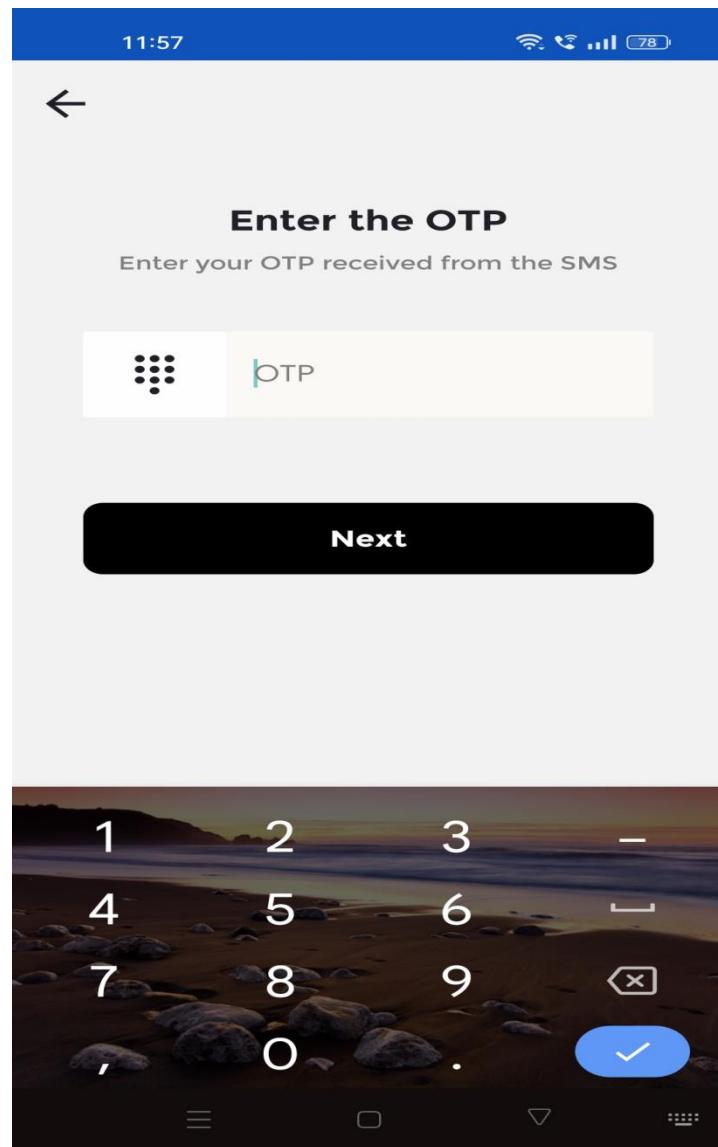

You can enter your information in the user name, email, and password fields on the new user registration page.

OTP

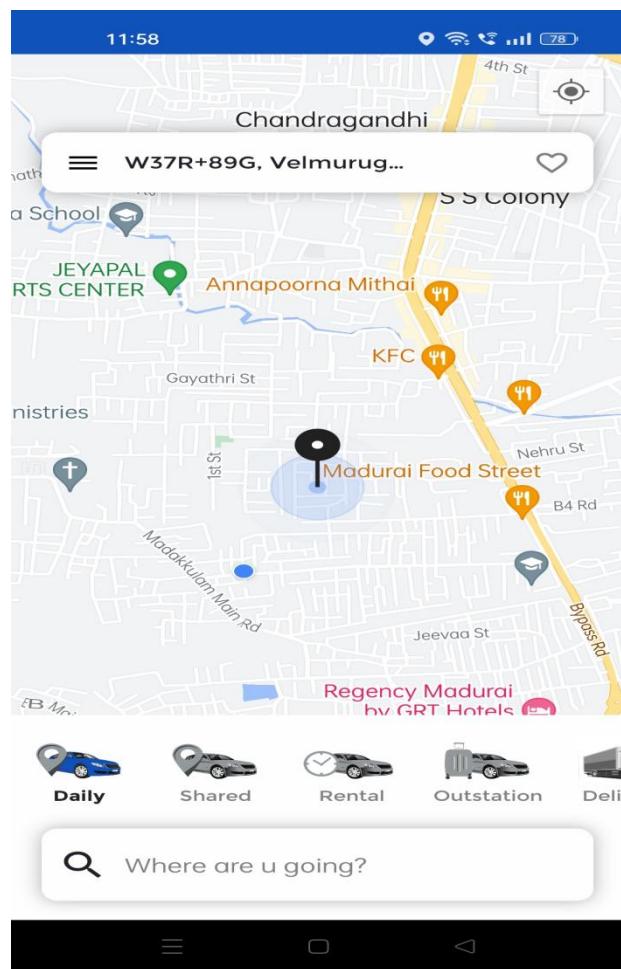

You can verify your OTP number on the app's OTP page. If you need to change your password at the same time, you must confirm the OTP that was sent to your registered phone number.

HOME:

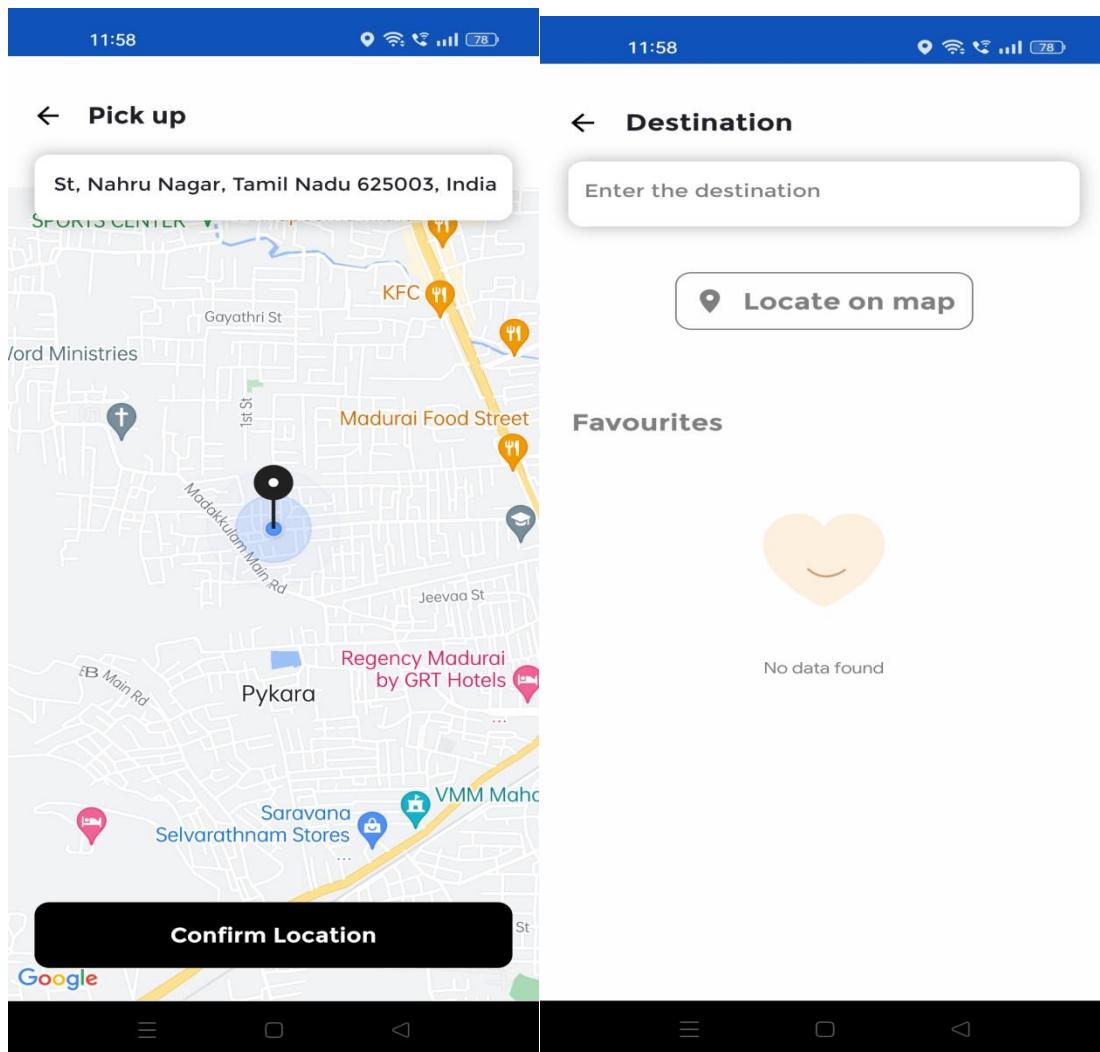

The list of services offered by this app is displayed on this page. Among the services we offer are auto, hatchback, sedan, SUV, and truck services. We offer the choice to modify the services via the admin panel.

The user can manually or dynamically add their pick-up and drop-off locations here. Additionally, we provided instant distance calculation in this application.

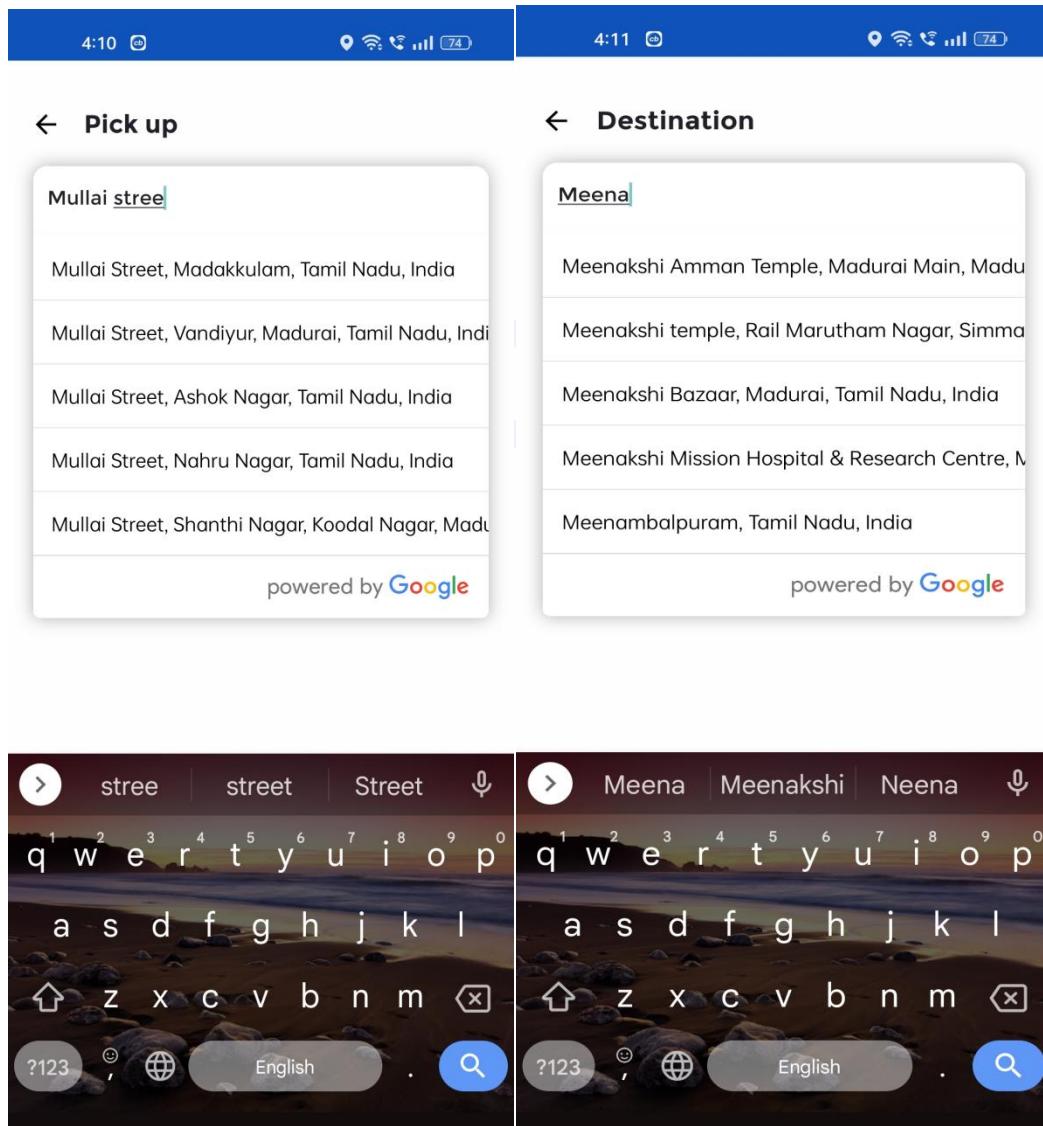

PICKUP AND DROP LOCATION BY SCROLLING OPTION

Here, the scrolling map is used to choose the pickup and drop-off locations based on customer simplification.

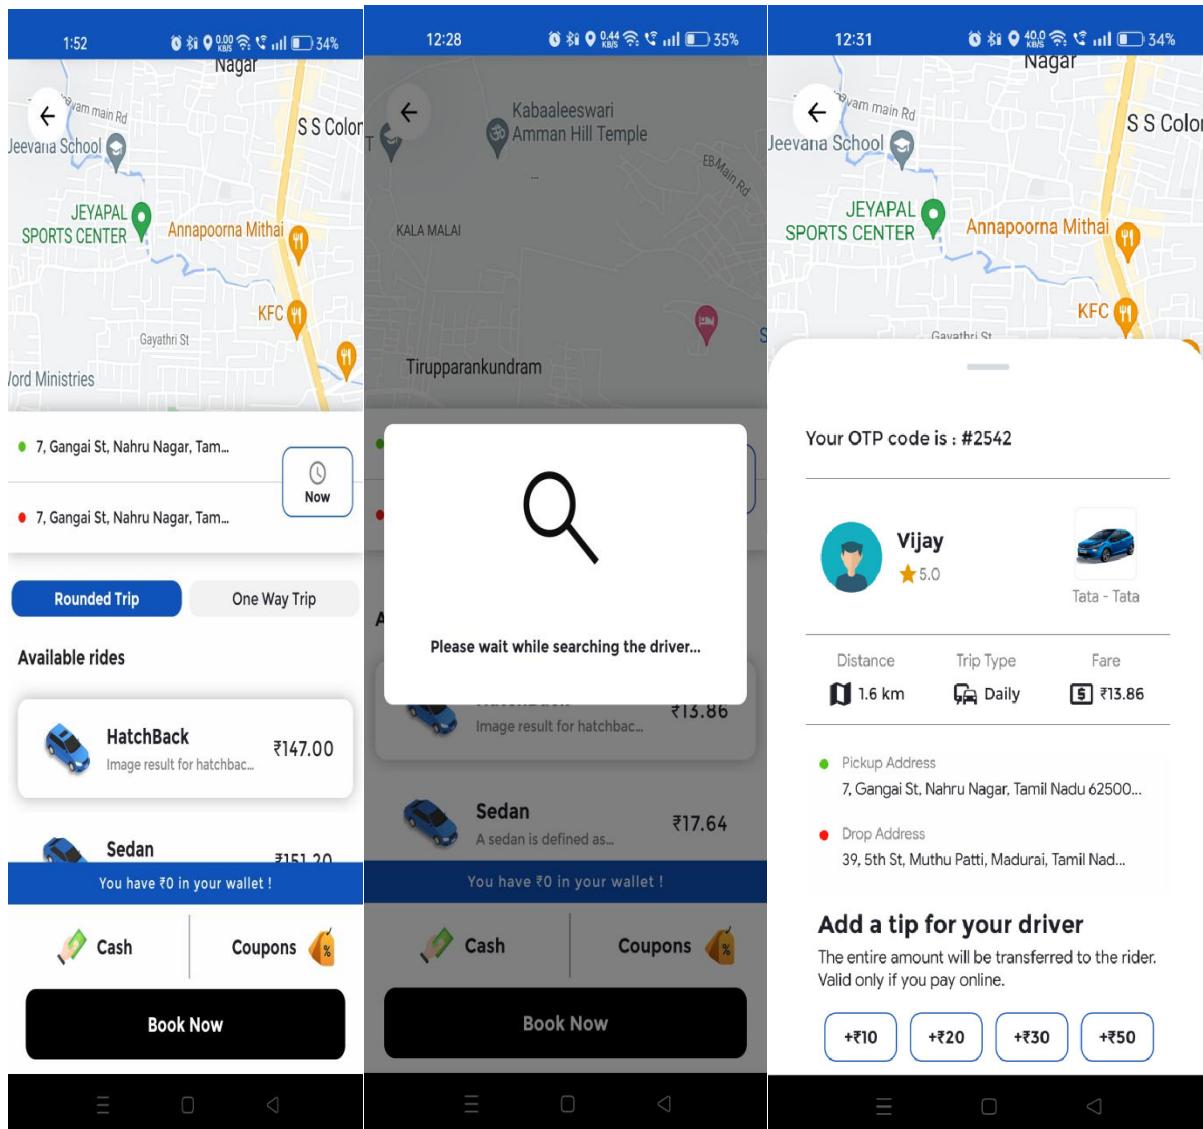

PICKUP AND DROP LOCATION SELECTING BY MANUAL OPTION

Here, the customer's search is used to manually type the pickup and drop-off location options.

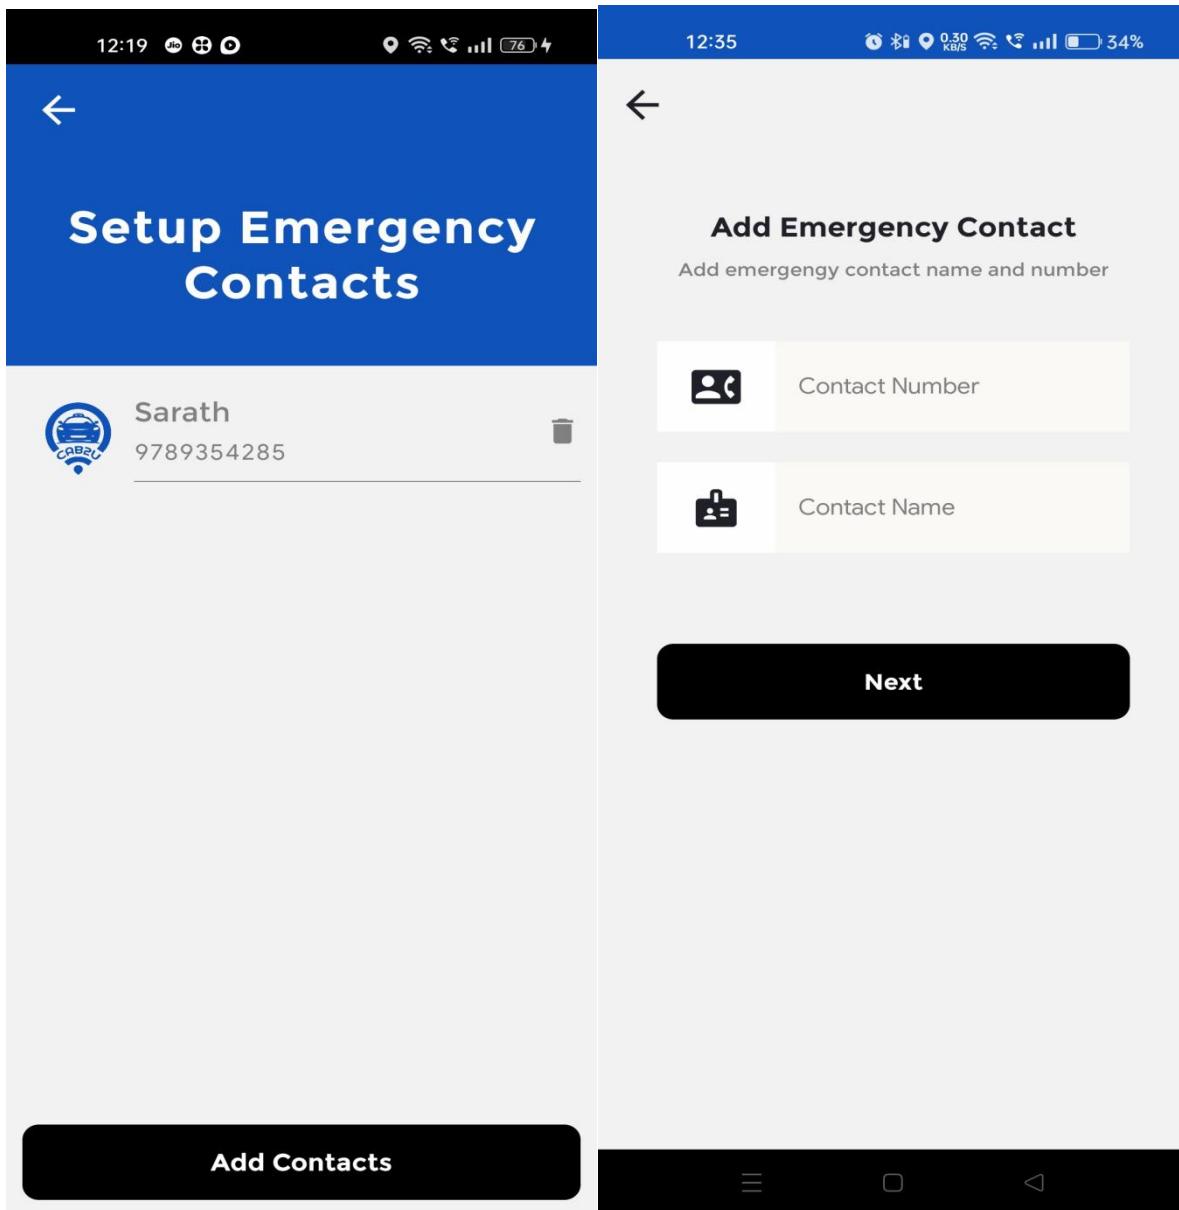

BOOKING RIDE

Below are the screens which the customer receives once they tried to book a ride.

EMERGENCY INFORMATION

Riders can press the SOS button in the event of an emergency or other unfortunate circumstance. So, their emergency contact received an SOS alert with a live location.

MY RIDES

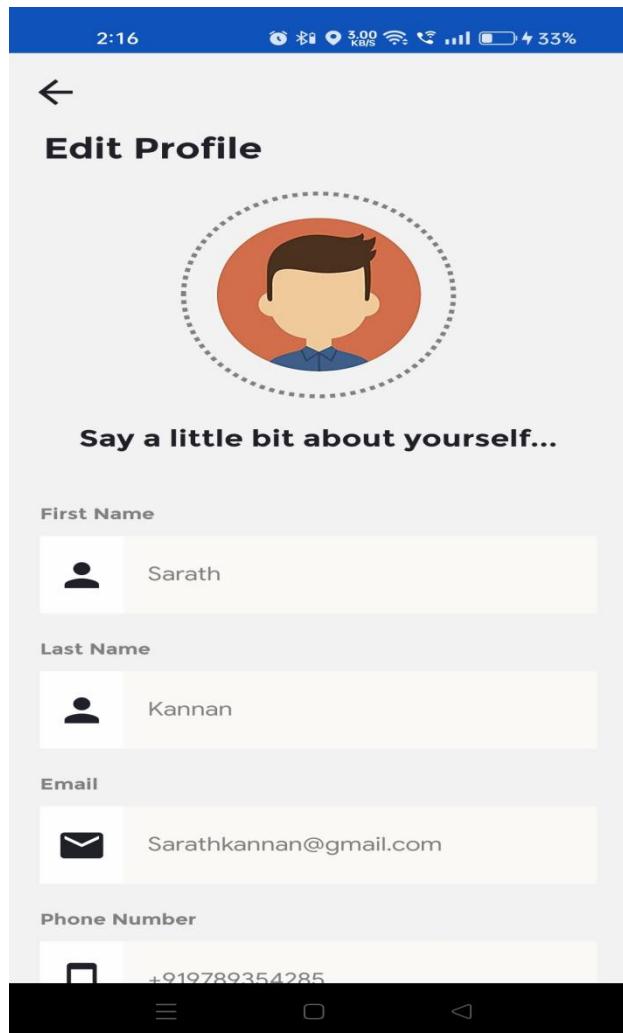

Riders are given a detailed view of their previous journey. Riders can view the pick-up and drop-off locations, the date, and other information on the My Rides page.

The image displays three separate screenshots of a mobile application's 'My Rides' section, each showing a list of completed journeys. Each screenshot includes a header bar with time, signal strength, battery level, and a back arrow. Below the header is a navigation bar with tabs: 'Upcoming' (blue), 'Completed' (white), and 'Cancelled' (blue). Each journey entry contains a driver profile picture, name, rating (4.5 stars), fare, distance, and a list of pickup and drop-off points with their addresses and coordinates. The journeys are timestamped and have a timestamp at the bottom right of each card.

Driver	Rating	Fare	Distance	Pickup Location	Dropoff Location	Date	Time
sarath	4.5	₹13.86	1.6 km	7, Gangai St, Nahru Nagar, Tamil Nadu 625003, India	33, Madurai -Thirumangalam Rd, Pasumalai, Madurai, Tamil Nadu 625004, India	17-Feb-2023	01:53 pm

PROFILE

Riders can manage their profile details like Photo, Name, Email address, Mobile number and Gender from their My Profile Page. They can also update password in here.

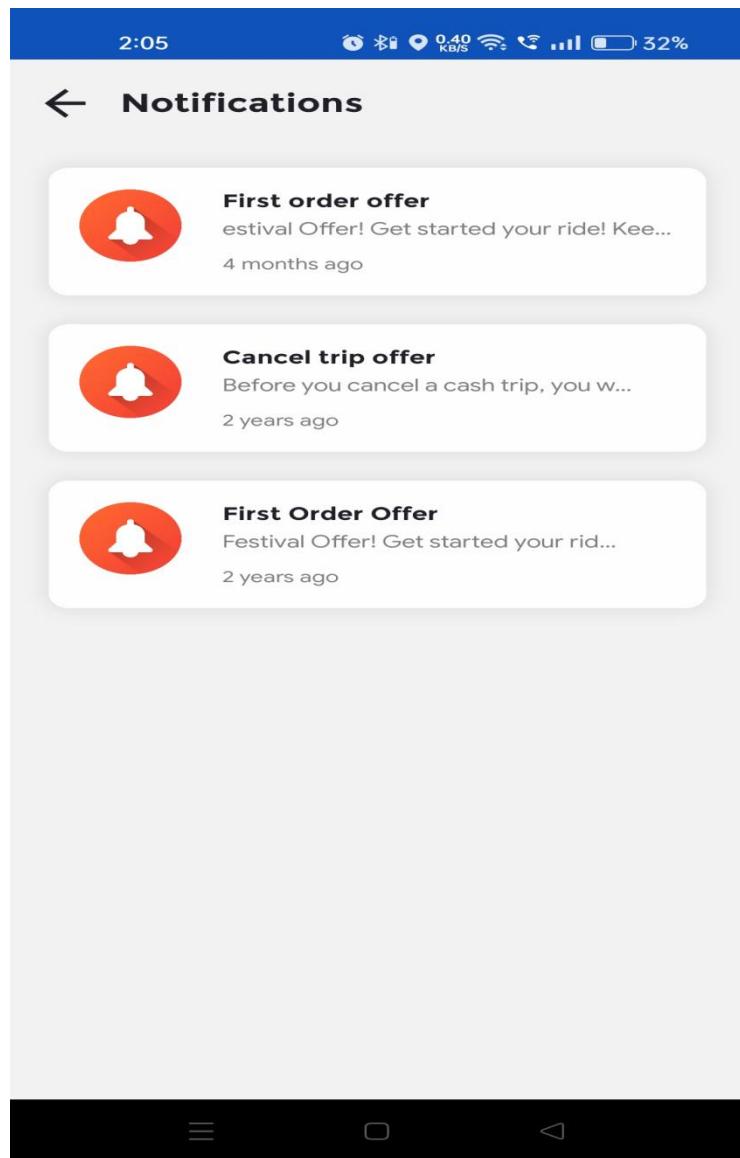

WALLET

Riders can add money to their wallets online. All wallet transactions and their details are displayed in the wallet section.

NOTIFICATIONS

Customers can access a page that informs them about all order offers.

FAQ

The Apps will include FAQ pages. Backend editing will be available to the administrator.

How can we help you?

- ≡ What is cancellation fee?
- ≡ How to change language settings of the app?
- ≡ Do you provide self drive cars?
- ≡ What if my cab shows up late?
- ≡ What if the cab breaks down during the journey?
- ≡ Do you provide an English-speaking driver?
- ≡ How can I get a bill/receipt for my trip?
- ≡ What is cancellation fee?

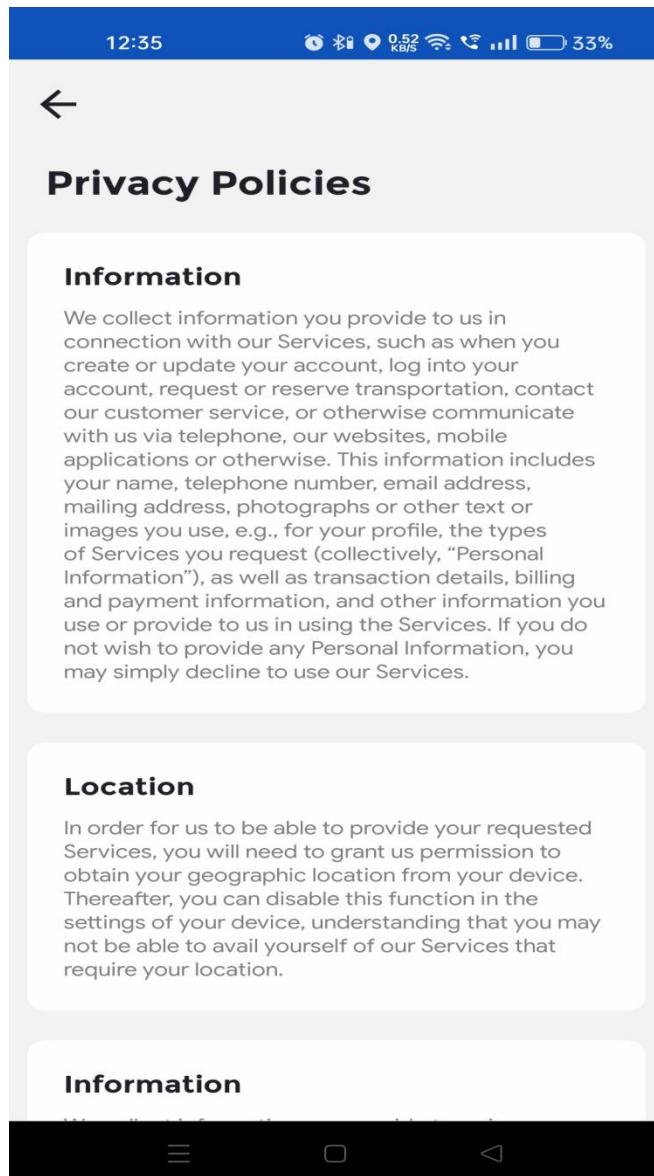

2:05 0.00 KB/S 32%

What is cancellation fee?

In Cab2door we appreciate the partners' time and, thus, we always compensate the time spent on the road to the passenger if the trip never took place. In that case, user can be charged with a volume of 40 USD, if: -you cancelled trip more than 5 minutes after you have accepted the request -you are late for more than 5 minutes after driver has arrived at the pickup location, and you didn't contact the driver to let him know about your delay User doesn't charged a cancellation fee, if: -you cancelled trip during first 5 minutes after making request -driver is late for more than 5 minutes (after ETA, which you've accepted while made request) Mention that if you are late, you can notify driver that you are late via call or sms.

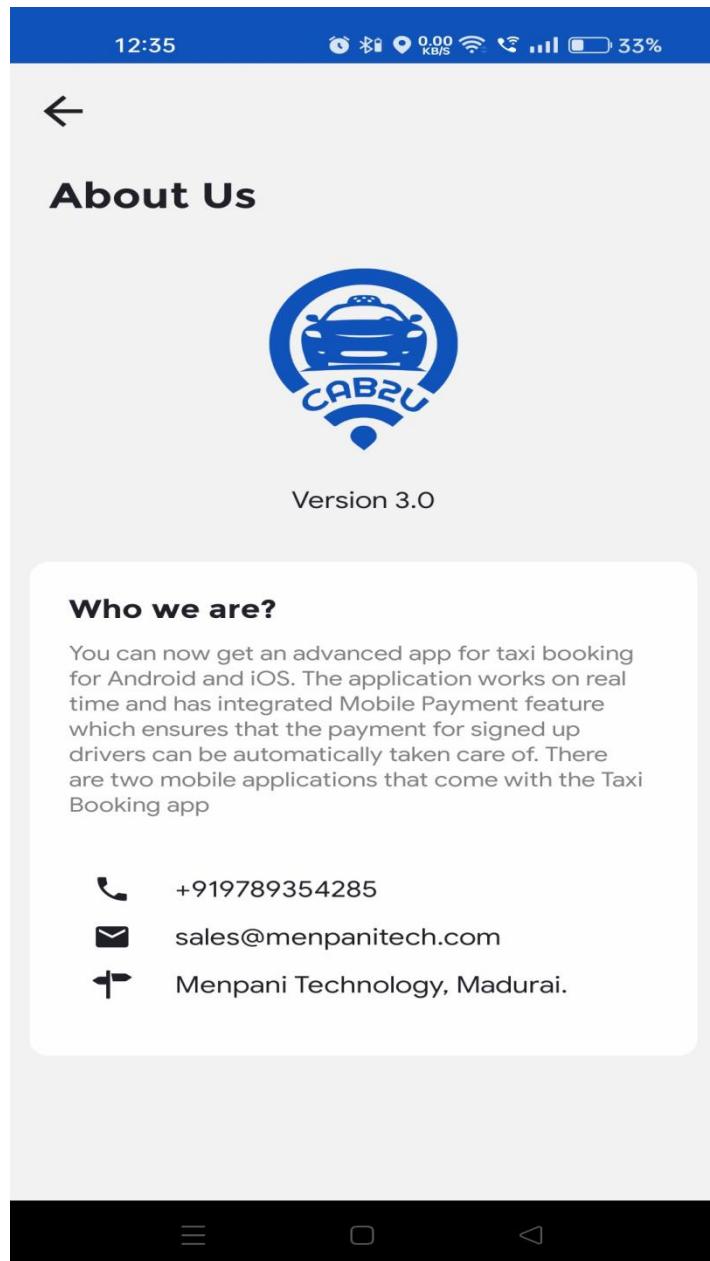

PRIVACY POLICIES

The Apps will have a Privacy Policy. Back end editing will be available to the administrator.

ABOUT US

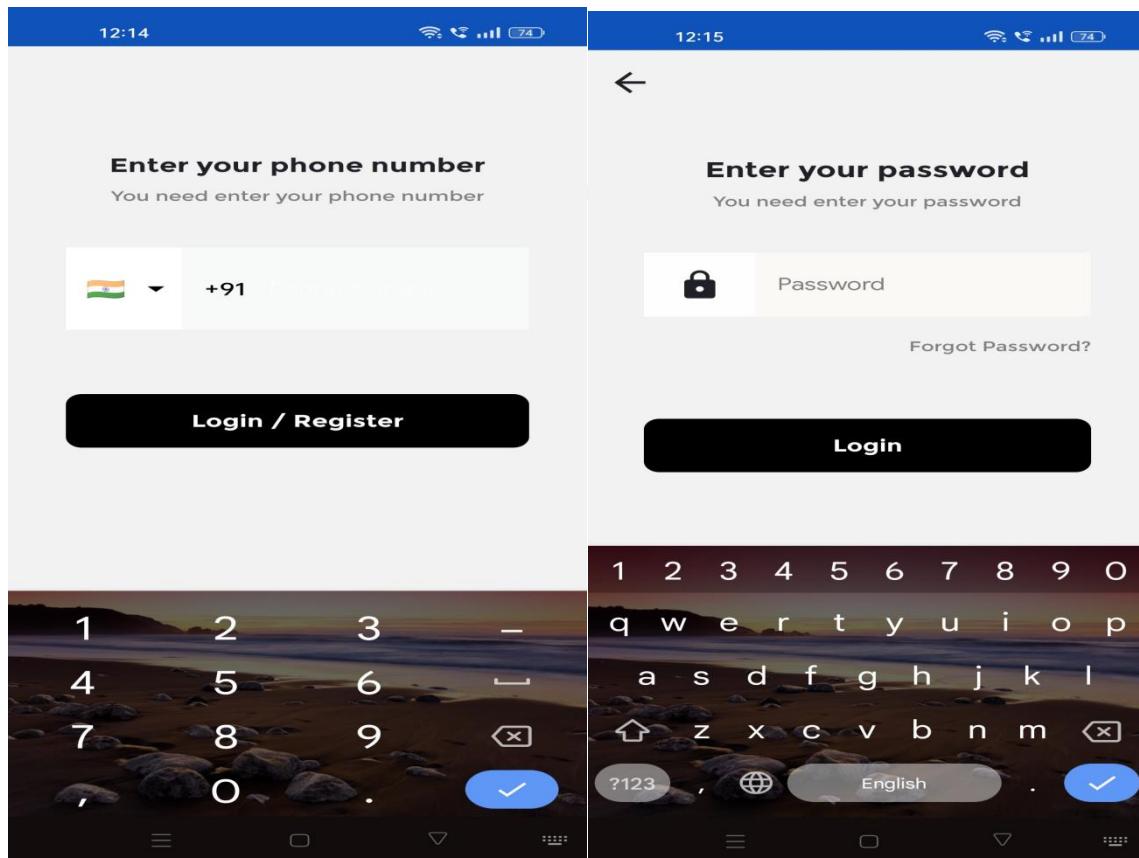

Riders can find administrative information such as contact information, email addresses, and addresses on this page.

DRIVER SLIDES

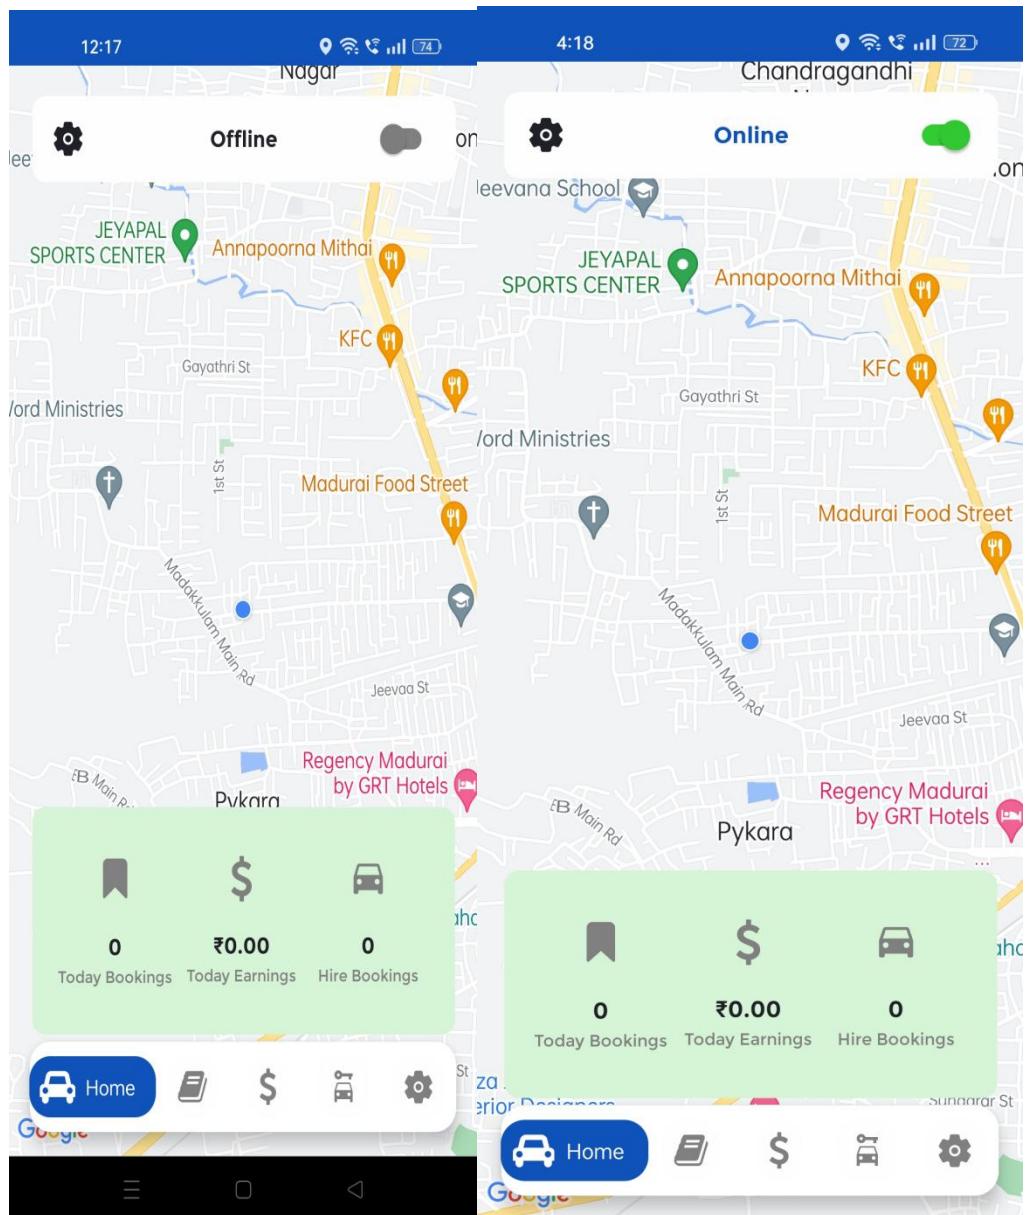

LOGIN

Driver can access her account by entering her registered phone number and password. If you can't remember your password, click the 'Forgot my password' link to get a new one.

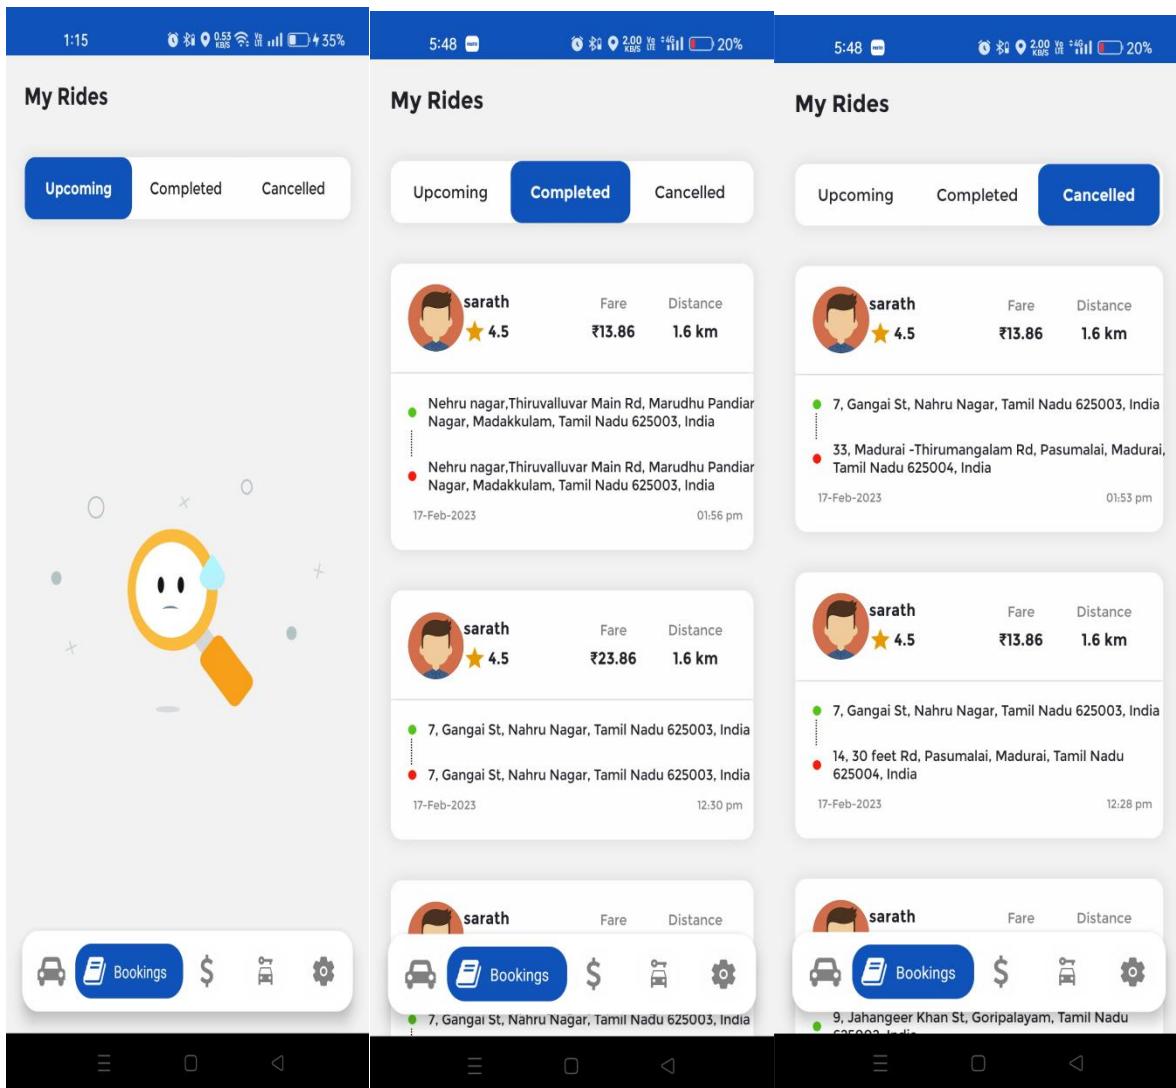

HOME

Driver availability is determined by the duty assigned to them while they are online and offline.

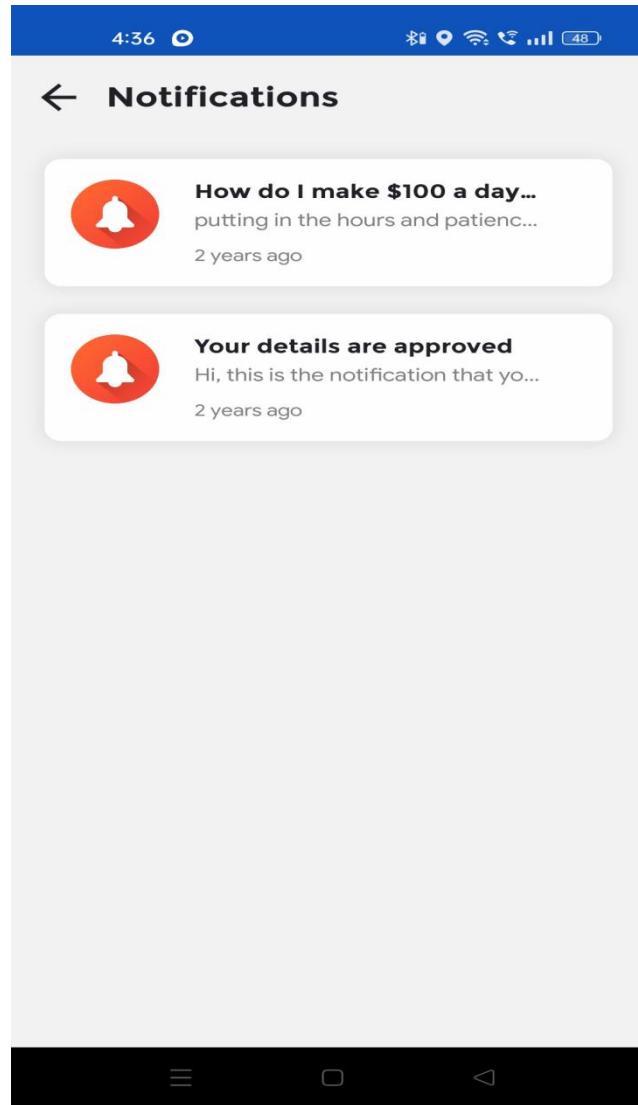

BOOKINGS

This screen displays rider information such as pickup time, pickup location, date, drop location, and assigned cab fare.

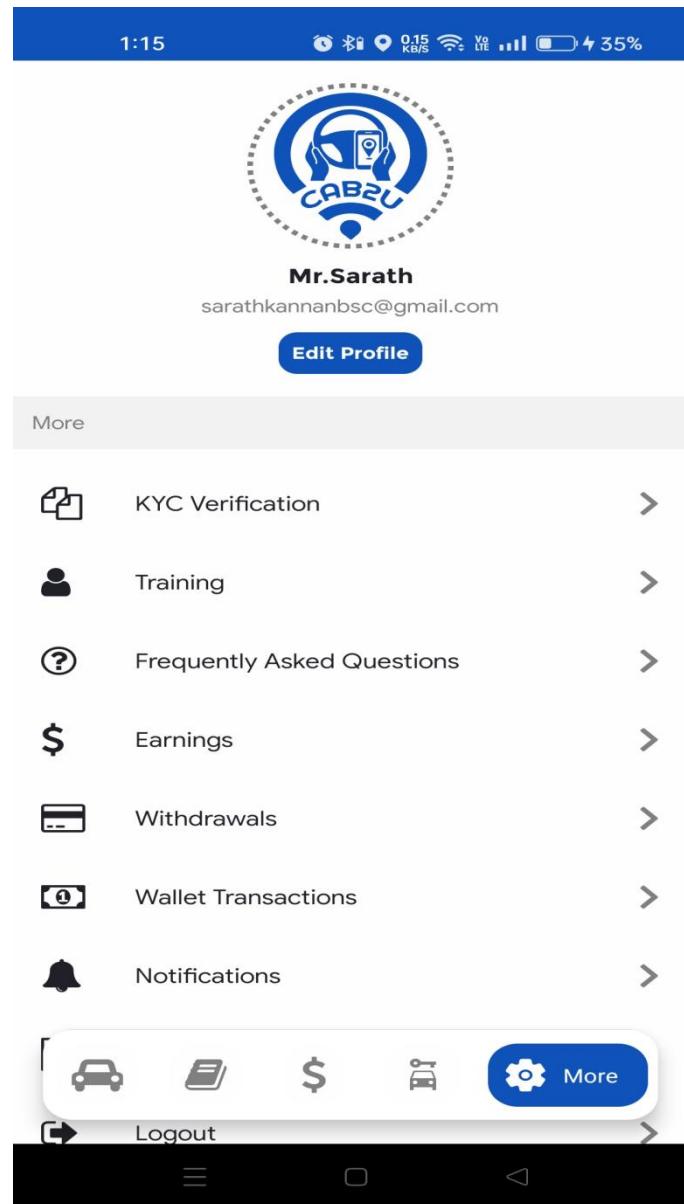

NOTIFICATIONS

The page for notifying drivers about your details has been approved.

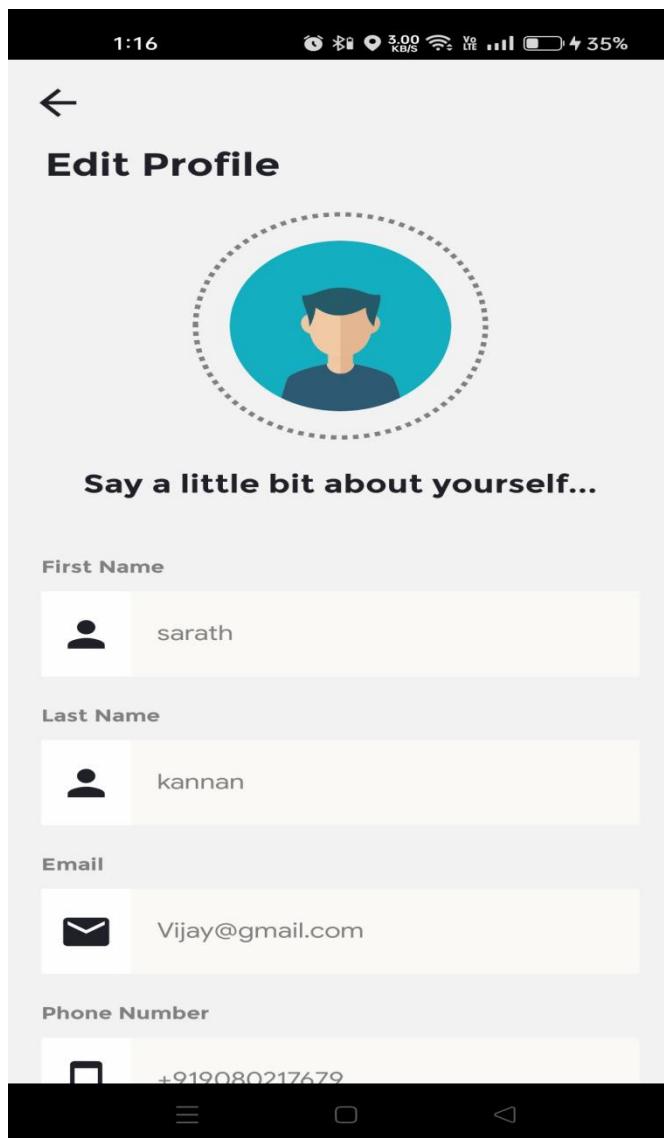

DRIVER MENU

A driver has access to the app's website menu, which includes the profile page, KYC verification, training page, partner care, earnings, withdrawal, wallet transactions, SOS settings, and Logout page.

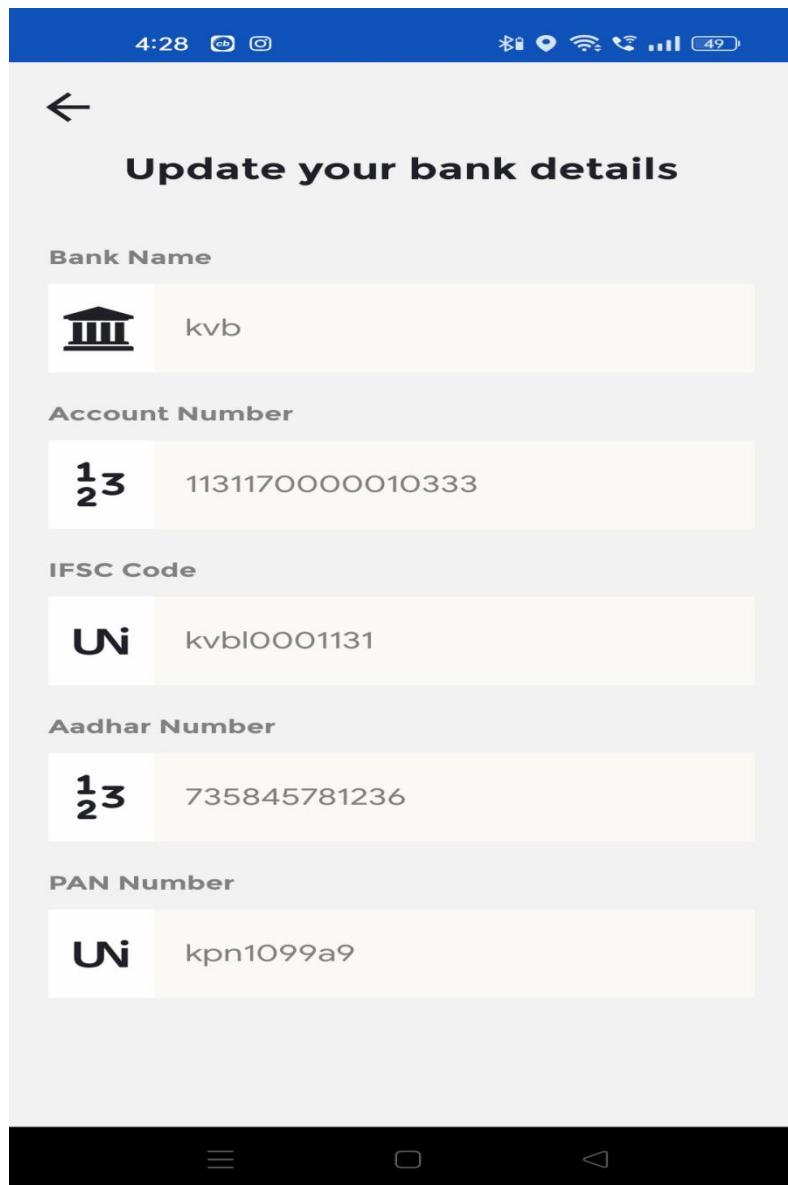

PROFILE

From the My Profile Page, drivers can edit their profile information such as their photo, first name, last name, email address, and phone number. They can also change their passwords here.

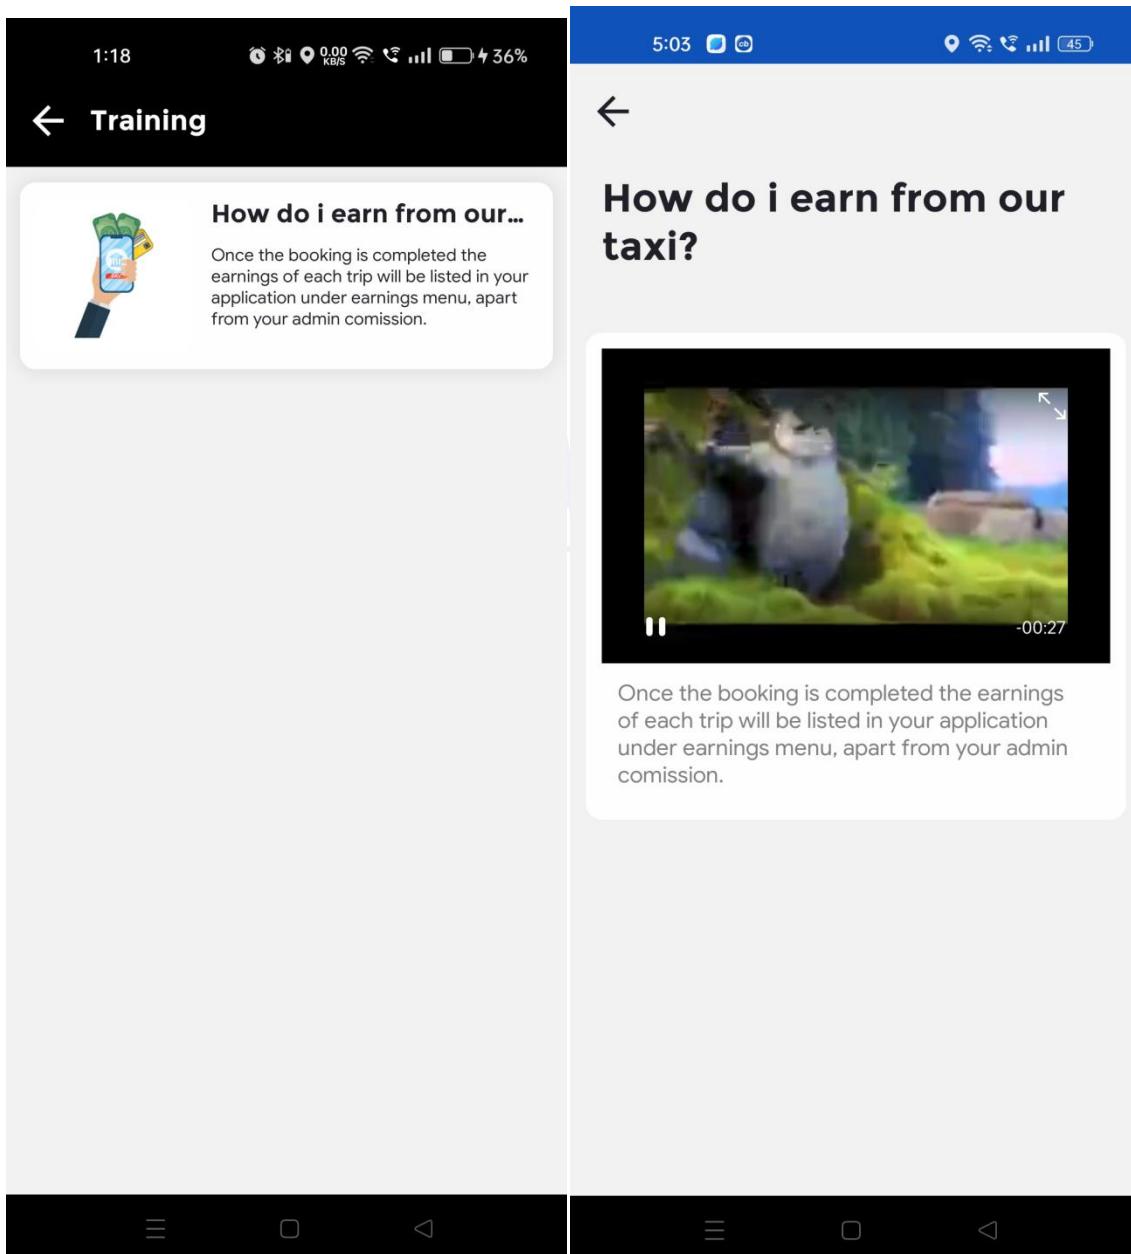

KYC VERIFICATION

Cab2u has simplified KYC verification. Drivers can enter their bank information here.

TRAINING

Cab2u offers drivers training in areas such as speed management, customer service, and vehicle maintenance.

PARTNER CARE

The Apps will include FAQ pages. Backend editing will be available to the administrator.

The image shows two side-by-side screenshots of a mobile application's FAQ section. Both screens have a blue header bar at the top with a back arrow icon. The left screen displays the main question "How can we help you?" in white text. Below it is a list of ten frequently asked questions, each preceded by a grey three-line icon. The right screen displays a specific question, "how to enter or change my destinations", in large black text. Below this question is a detailed answer in a white box, explaining the process of entering a destination before booking and how to change it during a ride. The bottom of both screens features a black navigation bar with three icons: a menu icon (three horizontal lines), a square icon, and a back arrow icon.

how to enter or change my destinations

You will need to enter your destination before confirming your booking. You can do this by: Entering the address in the 'destination' field at the top of the screen. You can also change your destination during your ride by: Clicking 'Edit' and entering the correct destination

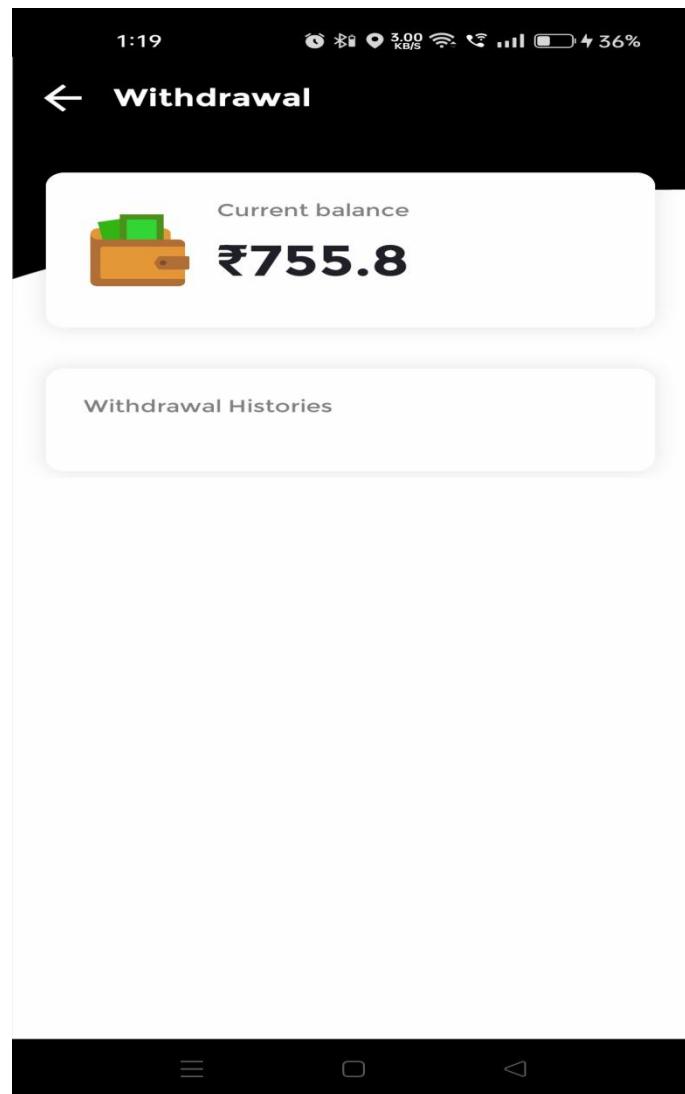

EARNINGS

Users can view your total cash value as well as how much money you make today.

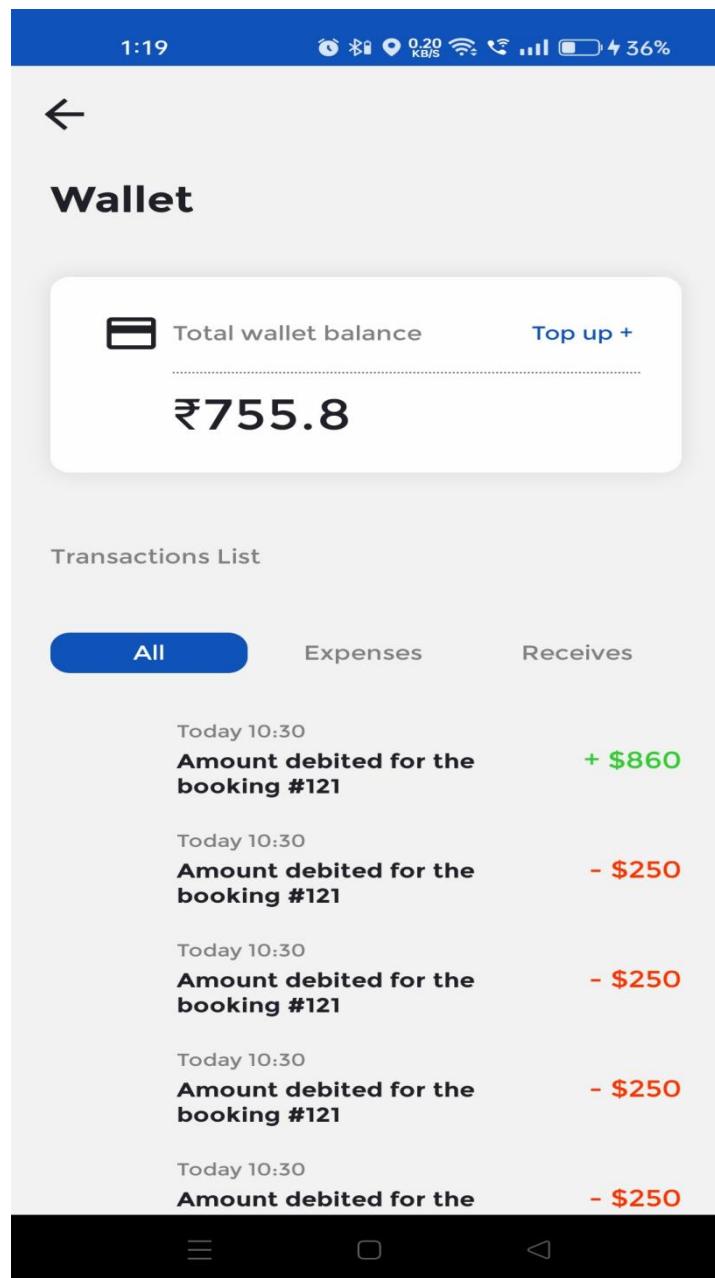

WITHDRAWAL

Cab2u drivers can make it easier to withdraw money from your balance.

WALLET TRANSACTIONS

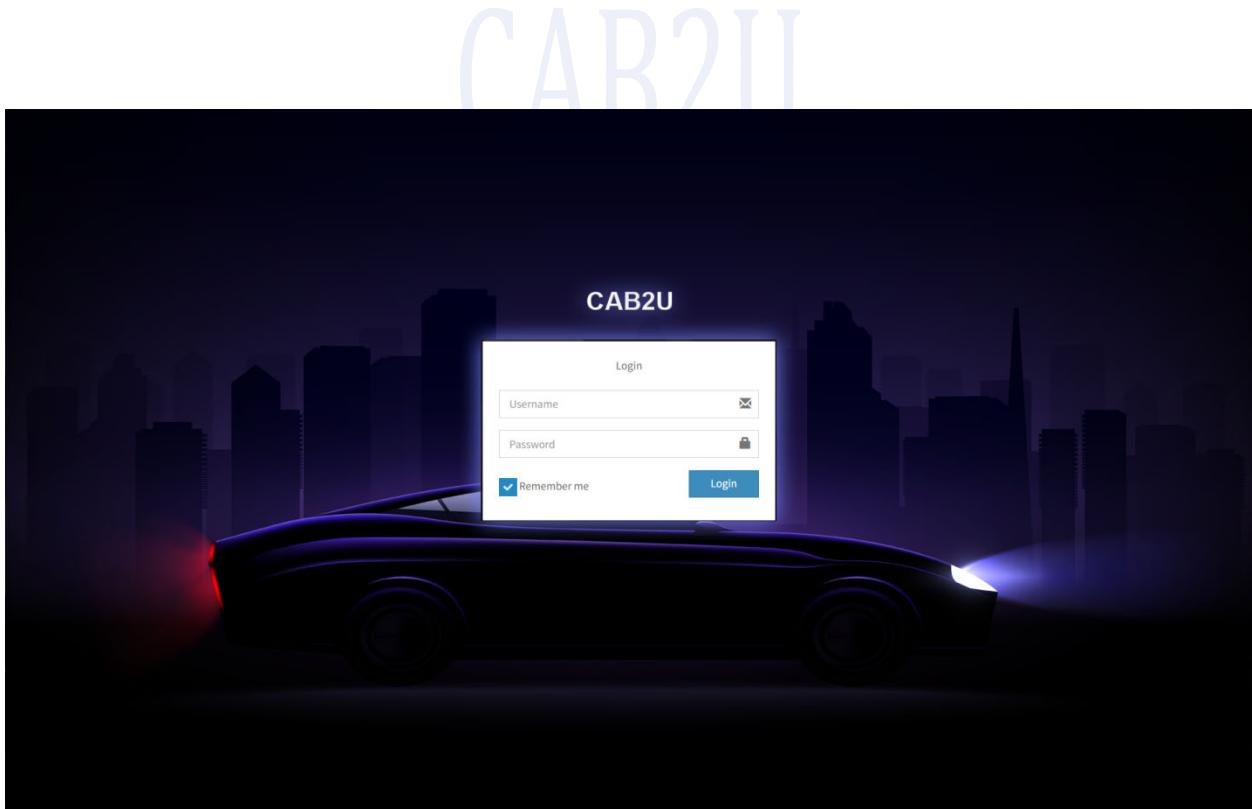

The wallet transaction details can be viewed by the driver.

CAB2U APP ADMINISTRATIVE PANEL

The admin panel is your one-stop shop for handling and managing your entire app. It allows you to add functionality to the apps and even get a good look at the map to see how your fleet is spread at any given time. It also shows you the number of rides booked through your app and the type of commission you earn on them. Everything from surcharges to vehicle type and rates can be customized. You can also view all reports to help you better plan your business.

This admin panel was created with everyone in mind. You don't have to be an expert in technology to work on it. Its responsive design and user-friendly interface will ensure that you don't need any assistance in determining what your taxi booking app is up to.

RIDERS MANAGEMENT

The administrator can manage the riders who have registered on the system. Any rider can be added, modified, or deleted by the administrator.

The screenshot shows a web-based administration interface for managing riders. On the left is a dark sidebar menu with various options like Dashboard, Settings, Currencies, Zones, Customers, Livechat, Drivers, Vehicle Categories, Trips, Driver Hiring Requests, Fare Managements, and Complaints. The 'Customers' option is currently selected. The main area is titled 'Customers List' and displays a table of 13 entries. The columns are: Id, Country, First Name, Last Name, Phone number, Email, Subscription, Gender, Country code, Currency, and Status. Each row contains a set of these details for a specific customer, such as Sarath Kannan with ID 1, or ELANGO with ID 13. The 'Status' column for all entries shows 'Active'. At the bottom of the table, it says 'Showing 1 to 13 of 13 entries' and includes a 'Show' dropdown set to 20, a 'entries' button, and a page navigation bar with a single page icon.

ID	Country	First Name	Last Name	Phone number	Email	Subscription	Gender	Country code	Currency	Status

DRIVERS MANAGEMENT

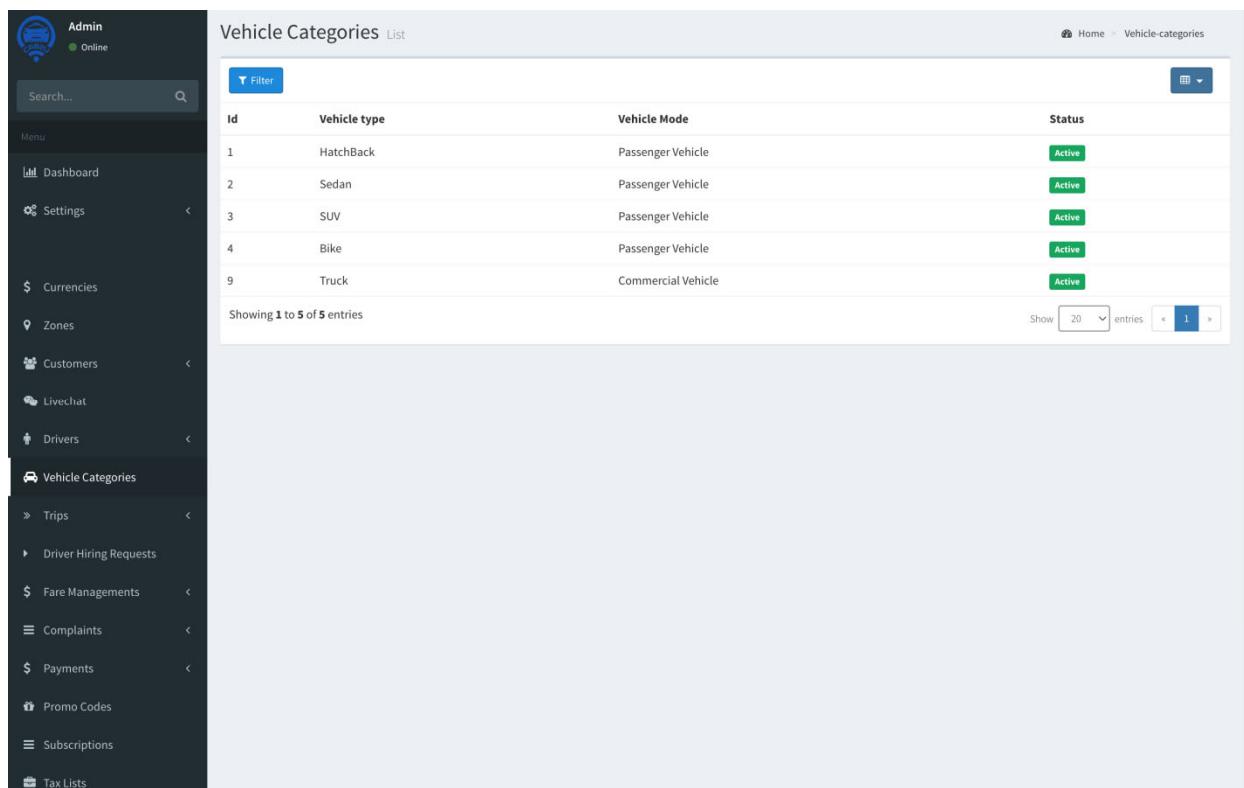

The administrator can manage the drivers who are registered on the system. Admin can review the documents and vehicles that they have added. Any driver's account can be approved or rejected by the admin. A driver can only go online if their account has been approved by the admin. Any driver can be added, modified, or deleted by the administrator.

The screenshot shows a web-based administrative interface for managing drivers. On the left is a dark sidebar menu with various options like Dashboard, Settings, Currencies, Zones, Customers, Livechat, Drivers, and Vehicle Categories. The 'Drivers' option is currently selected. The main content area is titled 'Drivers List' and displays a table of 13 driver entries. The columns are: Id, First Name, Last Name, Phone number, Email, Licence number, Id Proof Status, Status, and View Documents. The 'Status' column contains green 'Approved' buttons for most drivers, except for entries 4, 7, 8, 10, and 13 which show 'Waiting For Upload'. The 'View Documents' button is blue for all rows. At the bottom of the table, it says 'Showing 1 to 13 of 13 entries' and includes a 'Show' dropdown set to 20, a 'entries' dropdown set to 1, and navigation buttons.

ID	First Name	Last Name	Phone number	Email	Licence number	ID Proof Status	Status	View Documents

VEHICLE CATEGORIES MANAGEMENT

The vehicle document can be reviewed and approved by the administrator. The administrator can add the drivers given the details, and the administrator can review the submitted by category and approve or reject the vehicle.

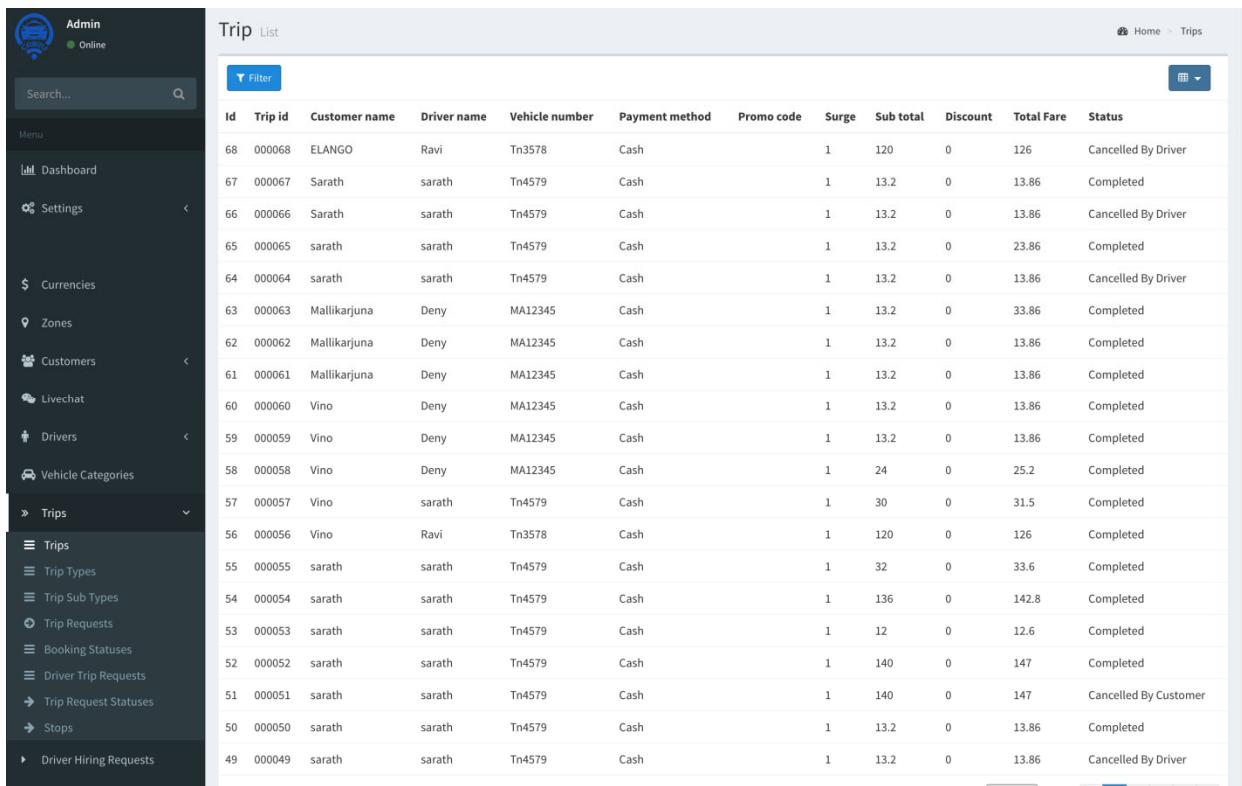

The screenshot shows a web-based administration interface for managing vehicle categories. On the left is a dark sidebar menu with various administrative options like Dashboard, Settings, Currencies, Zones, Customers, Livechat, Drivers, Vehicle Categories, Trips, Driver Hiring Requests, Fare Managements, Complaints, Payments, Promo Codes, Subscriptions, and Tax Lists. The main content area is titled "Vehicle Categories List". It displays a table with the following data:

ID	Vehicle type	Vehicle Mode	Status
1	HatchBack	Passenger Vehicle	Active
2	Sedan	Passenger Vehicle	Active
3	SUV	Passenger Vehicle	Active
4	Bike	Passenger Vehicle	Active
9	Truck	Commercial Vehicle	Active

At the bottom of the table, it says "Showing 1 to 5 of 5 entries". To the right of the table are buttons for "Show 20 entries" and navigation arrows. The top right corner of the main area shows "Home > Vehicle-categories".

TRIP MANAGEMENT

On the system, admin can see all of the trips that have been completed thus far. Admin can view the status of any trip and filter it by customer name, driver name, vehicle number, payment method, promo code, sub-total, discount, and total fare.

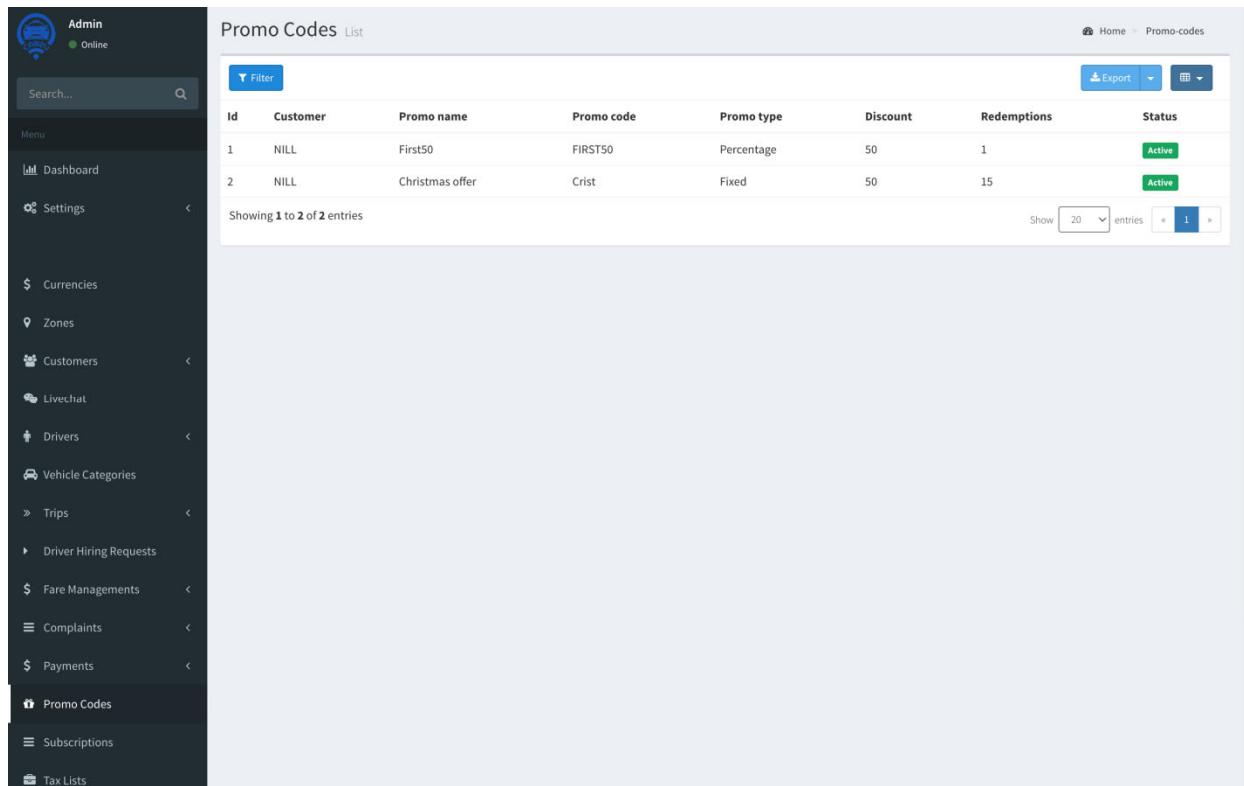

The screenshot shows a web-based application interface for trip management. On the left is a dark sidebar menu with various administrative options like Dashboard, Settings, Currencies, Zones, Customers, Livechat, Drivers, Vehicle Categories, and Trips. The 'Trips' option is currently selected and expanded, showing sub-options for Trips, Trip Types, Trip Sub Types, Trip Requests, Booking Statuses, Driver Trip Requests, Trip Request Statuses, Stops, and Driver Hiring Requests. The main content area is titled 'Trip List' and displays a table of trip data. The table has columns for Id, Trip id, Customer name, Driver name, Vehicle number, Payment method, Promo code, Surge, Sub total, Discount, Total Fare, and Status. There are 21 rows of data, each representing a trip record with details such as customer names like ELANGO, SARATH, and VINO, and various driver names and vehicle numbers. The 'Status' column indicates the status of each trip, with many entries being 'Completed' or 'Cancelled By Driver'.

ID	Trip id	Customer name	Driver name	Vehicle number	Payment method	Promo code	Surge	Sub total	Discount	Total Fare	Status
68	000068	ELANGO	Ravi	Tn3578	Cash		1	120	0	126	Cancelled By Driver
67	000067	Sarath	sarath	Tn4579	Cash		1	13.2	0	13.86	Completed
66	000066	Sarath	sarath	Tn4579	Cash		1	13.2	0	13.86	Cancelled By Driver
65	000065	sarath	sarath	Tn4579	Cash		1	13.2	0	13.86	Completed
64	000064	sarath	sarath	Tn4579	Cash		1	13.2	0	13.86	Cancelled By Driver
63	000063	Mallikarjuna	Deny	MA12345	Cash		1	13.2	0	33.86	Completed
62	000062	Mallikarjuna	Deny	MA12345	Cash		1	13.2	0	13.86	Completed

52	000052	sarath	sarath	Tn4579	Cash		1	140	0	147	Completed
51	000051	sarath	sarath	Tn4579	Cash		1	140	0	147	Cancelled By Customer
50	000050	sarath	sarath	Tn4579	Cash		1	13.2	0	13.86	Completed
49	000049	sarath	sarath	Tn4579	Cash		1	13.2	0	13.86	Cancelled By Driver

PROMO CODES

Use a promo code to offer discounts and promotions to your riders while also promoting your services. To get more rides, offer discounts on festivals and other events.

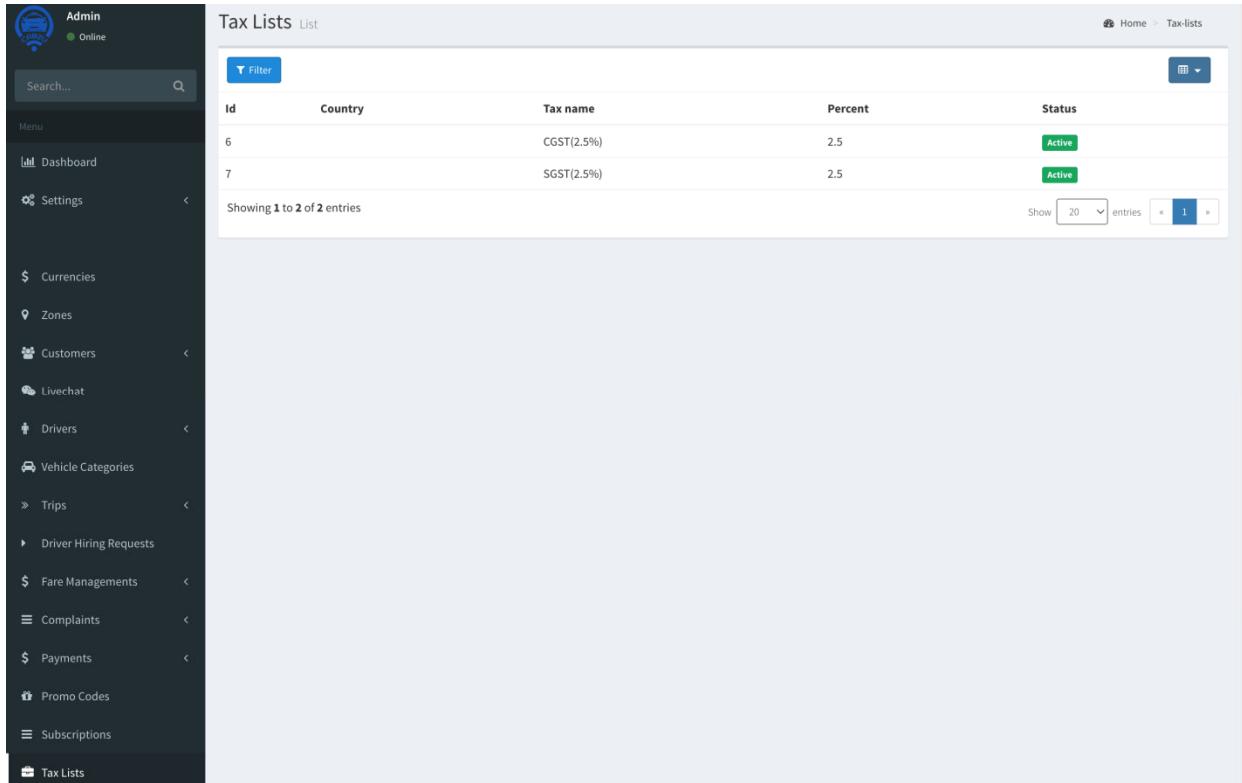

The screenshot shows the Admin dashboard with a dark theme. On the left, there's a sidebar with various menu items: Admin (Online), Search..., Menu, Dashboard, Settings, Currencies, Zones, Customers, Livechat, Drivers, Vehicle Categories, Trips, Driver Hiring Requests, Fare Managements, Complaints, Payments, Promo Codes (which is the active page), Subscriptions, and Tax Lists. The main content area is titled "Promo Codes List". It shows a table with two entries:

ID	Customer	Promo name	Promo code	Promo type	Discount	Redemptions	Status
1	NILL	First50	FIRST50	Percentage	50	1	Active
2	NILL	Christmas offer	Crist	Fixed	50	15	Active

At the bottom of the table, it says "Showing 1 to 2 of 2 entries". There are buttons for "Show 20 entries" and a search bar. The status column for both rows is "Active".

TAX LISTS

The tax can be added by the administrator based on the country. He has the ability to add, edit, and delete tax list pages.

The screenshot shows the 'Tax Lists' section of the admin dashboard. On the left is a sidebar with various menu items like Dashboard, Settings, Currencies, Zones, Customers, Livechat, Drivers, Vehicle Categories, Trips, Driver Hiring Requests, Fare Managements, Complaints, Payments, Promo Codes, Subscriptions, and Tax Lists. The 'Tax Lists' item is highlighted. The main area is titled 'Tax Lists List' and displays a table with two entries:

ID	Country	Tax name	Percent	Status
6		CGST(2.5%)	2.5	Active
7		SGST(2.5%)	2.5	Active

Below the table, it says 'Showing 1 to 2 of 2 entries'. There are buttons for 'Show 20 entries' and a page number '1'.

NOTIFICATION MESSAGES

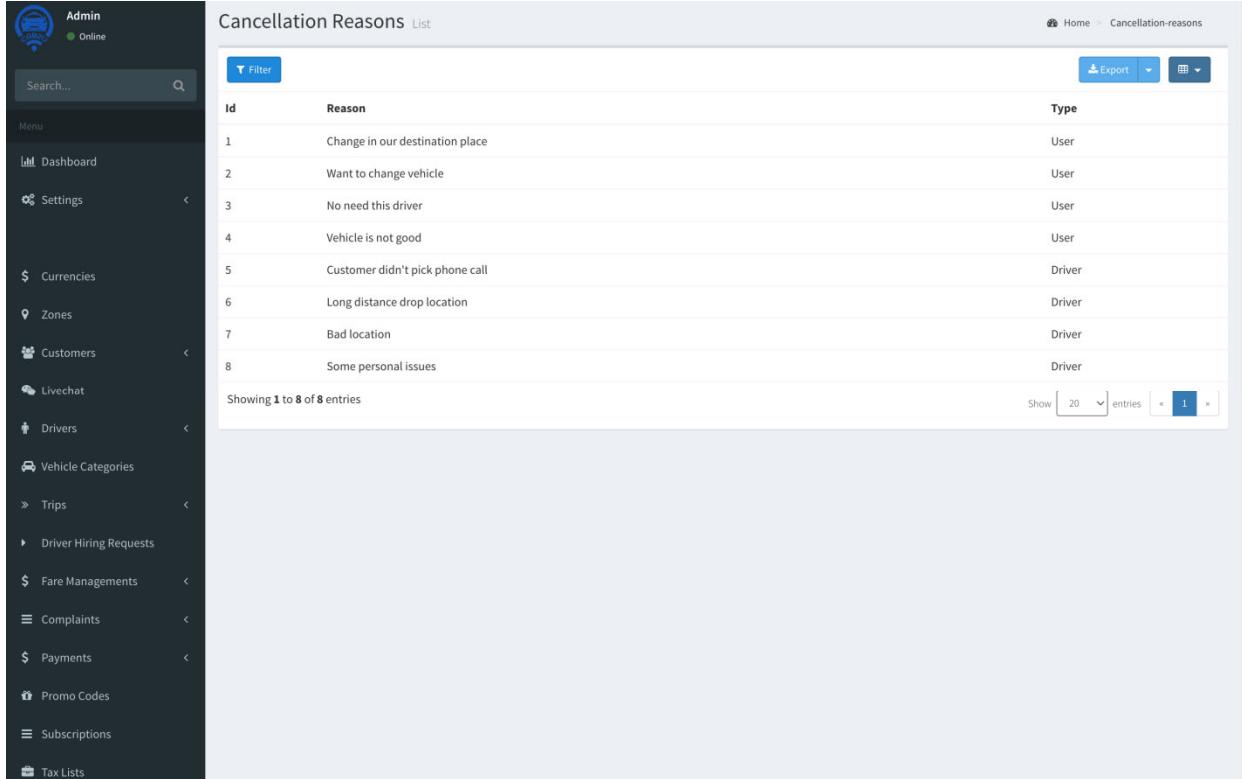

This is a feature that will allow you to connect with your entire user base by informing them about various other offers or promotions you have. You can choose the user type, the riders, and the message you want to send.

The screenshot shows the 'Notification Messages List' page within an admin dashboard. The left sidebar contains a navigation menu with items like Dashboard, Settings, Currencies, Zones, Customers, Livechat, Drivers, Vehicle Categories, Trips, Driver Hiring Requests, Fare Managements, Complaints, Payments, and Promo Codes. The top right corner shows 'Home' and 'Notification-messages'. The main content area displays a table with columns: Id, Type, Title, Message, and Status. There are 9 entries listed:

ID	Type	Title	Message	Status
1	User	First Order Offer	Festival Offer! Get started your ride! Keep Purchasing with fast ride. Enter your destination address in the "Where to?" box, or tap a shortcut icon at the bottom of your screen. Shortcuts include recent destinations from your ride history or custom "Saved Places" you can set in your app. Your default pickup point is set to your current GPS location. If you are not being picked up at your current location, tap your pickup location on the map and update the address. When your request has been accepted, you'll see your driver's location on your map and an estimated time of arrival at your pickup location. Remember to keep each stop under 3 minutes. If you're splitting your fare, it will be split for the entire ride, not split by the cost to each stop. Creating an Uber account requires a valid email address and phone number. You'll also need to create a password and agree to terms and conditions and our privacy notice.	Active
2	Driver	Your details are approved	Hi, this is the notification that your driver details are approved. When a new processor is added to the vendor, the operating system sends this notification to device drivers after the operating system has started the new processor, but before the operating system begins scheduling threads on the processor. When a device driver receives this notification, it can allocate any per processor data structures and assign any other per processor resources to the new processor. This prepares the device driver to run its dispatch routines, interrupt service routines (ISRs), deferred procedure calls (DPCs), and any other driver threads on the new processor. Fill in your first and last name, phone number, and preferred language. Once you complete this part of the signup process, we send a text SMS to verify your phone number. After you provide this info, we'll send an email to confirm your account registration. Once you confirm, you'll be able to use your app to request a ride.	Active
3	User	Cancel trip offer	Before you cancel a cash trip, you will receive a notification to ensure that you are aware of the fee that will be added to your next trip. After completing your next trip, the total fare that you will pay will include the fare as well as the previous trip's cancellation fee. If you have cancelled multiple cash trips consecutively, the cancellation fees for the multiple trips will accumulate as arrears and prevent any more requests from going through. In such cases, you're expected to clear the arrears using an alternative payment method, such as a credit or debit card. Once the payments in arrears have been cleared, you will be able to request an taxi as usual.	Active
4	Driver	How do I make \$100 a day on taxi?	putting in the hours and patience. I average \$10 per trip and about \$15 per hour. Sometimes it is easy and within 3 hours, I have surpassed the \$100 mark. Other times, I sit and wait for hours. I'll drive from the airport sometimes to get into town and hit the downtown crowds just before/after dinner, late night is good but stressful (or funny, depending on your patience). Finding a good location in your area is key... I know that if I park at an intersection that gives me multiple areas (north and west in my case), that I'll have a pickup in a few minutes (good for the weekday mid evening times).	Active
9	User	First order offer	Festival Offer! Get started your ride! Keep Purchasing with fast ride. Enter your destination address in the "Where to?" box, or tap a shortcut icon at the bottom of your screen. Shortcuts include recent destinations from your ride history or custom "Saved Places" you can set in your app. Your default pickup point is set to your current GPS location. If you are not being picked up at your current location, tap your pickup location on the map and update the address. When your request has been accepted, you'll see your driver's location on your map and an estimated time of arrival at your pickup location. Remember to keep each stop under 3 minutes. If you're splitting your fare, it will be split for the entire ride, not split by the cost to each stop. Creating an Uber account requires a valid email address and phone number. You'll also need to create a password and agree to terms and conditions and our privacy notice.	Active

CANCELLATION REASONS

Customers can choose from a variety of reasons to reject the trip. The cancellation reasons page can be added, edited, and deleted by the administrator.

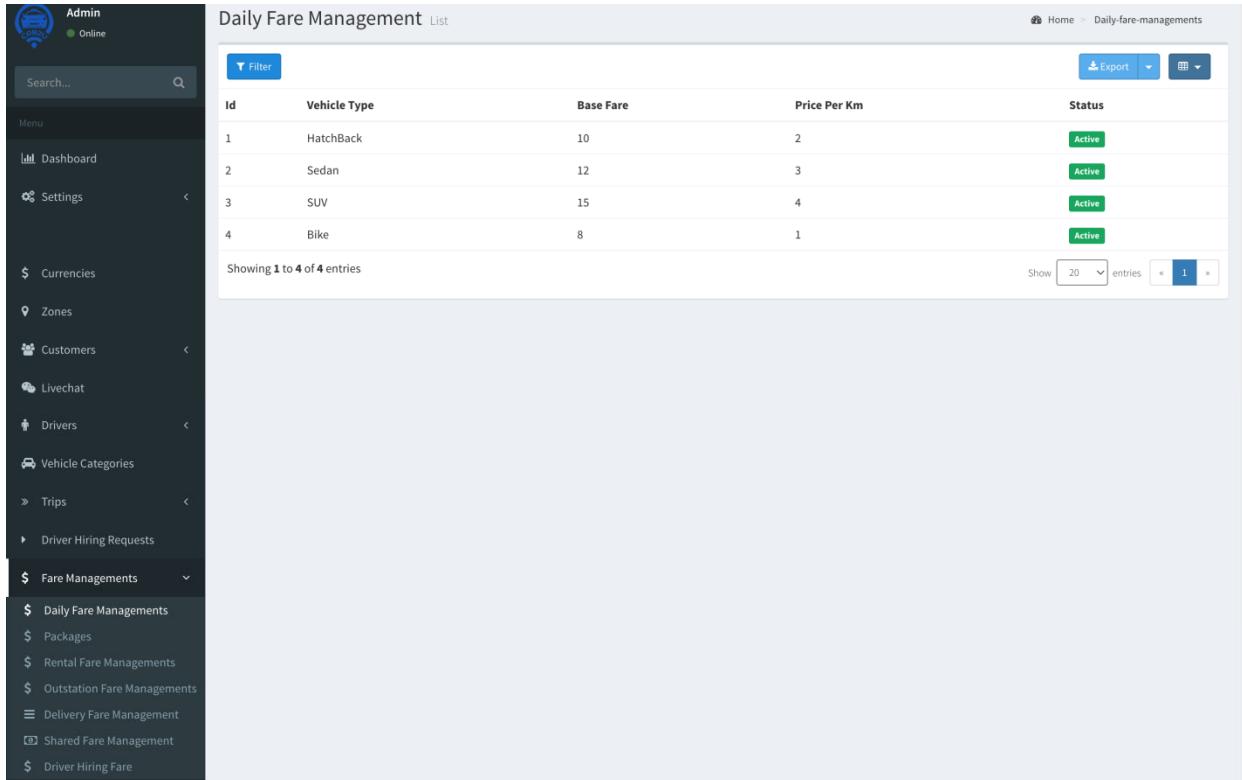

The screenshot shows the 'Cancellation Reasons' list page within a web-based administration interface. On the left, there is a dark sidebar menu with various administrative options like Dashboard, Settings, Customers, and Trips. The main content area is titled 'Cancellation Reasons List'. It features a table with columns for 'Id', 'Reason', and 'Type'. The table contains 8 entries:

Id	Reason	Type
1	Change in our destination place	User
2	Want to change vehicle	User
3	No need this driver	User
4	Vehicle is not good	User
5	Customer didn't pick phone call	Driver
6	Long distance drop location	Driver
7	Bad location	Driver
8	Some personal issues	Driver

At the bottom of the table, it says 'Showing 1 to 8 of 8 entries'. There are also buttons for 'Show 20 entries' and navigation arrows.

FARE MANAGEMENT

The administrator can view the fare management and define the vehicle type, fare type, base fare, and price per kilometer. This fare is dynamically displayed in the customer app.

The screenshot shows the 'Daily Fare Management List' page. On the left is a dark sidebar with navigation links: Admin (Online), Search..., Menu, Dashboard, Settings, Currencies, Zones, Customers, Livechat, Drivers, Vehicle Categories, Trips, Driver Hiring Requests, Fare Managements (selected), Daily Fare Managements (selected), Packages, Rental Fare Managements, Outstation Fare Managements, Delivery Fare Management, Shared Fare Management, and Driver Hiring Fare.

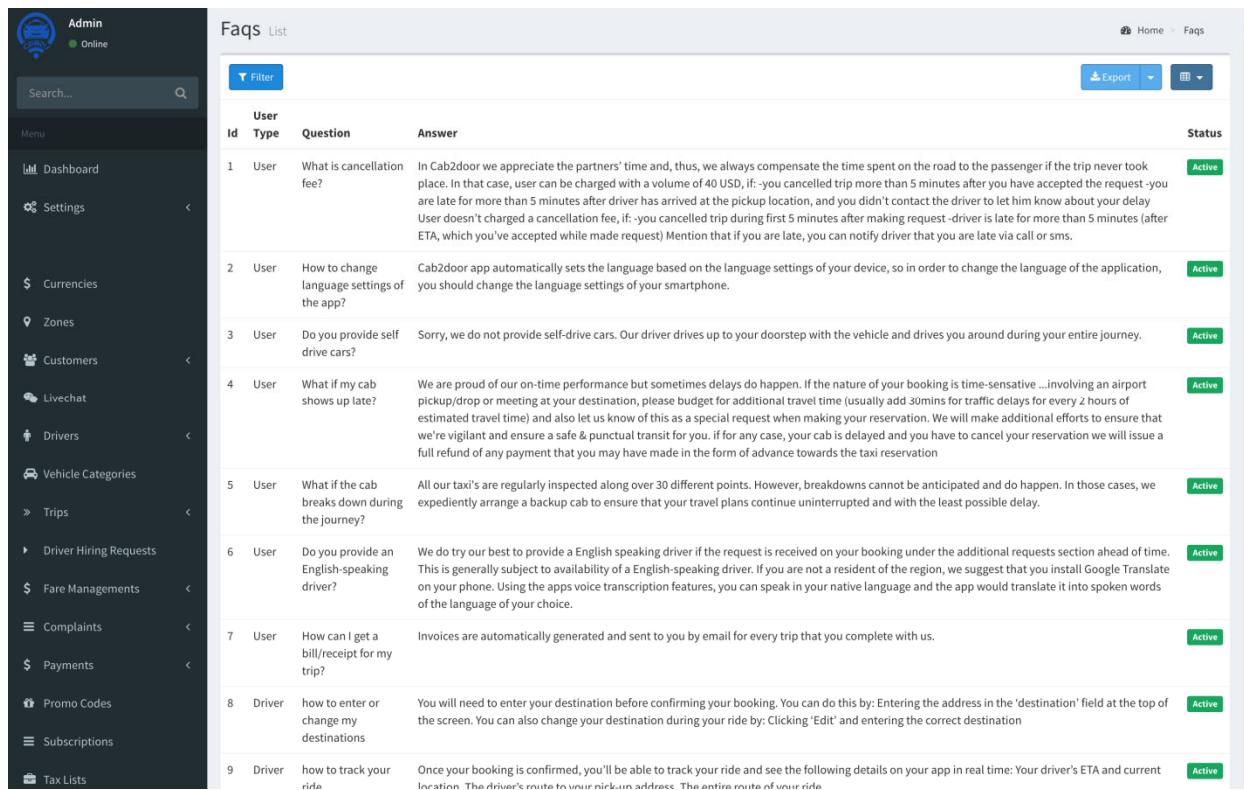

The main content area has a header 'Daily Fare Management List' with a back arrow, Home, and Daily-fare-managements. It includes a 'Filter' button, an 'Export' button, and a table with columns: Id, Vehicle Type, Base Fare, Price Per Km, and Status. The table data is:

ID	Vehicle Type	Base Fare	Price Per Km	Status
1	HatchBack	10	2	Active
2	Sedan	12	3	Active
3	SUV	15	4	Active
4	Bike	8	1	Active

At the bottom, it says 'Showing 1 to 4 of 4 entries' and has a 'Show' dropdown set to 20, a 'entries' dropdown set to 1, and a page number '1'.

FAQ

It displays frequently asked questions and answers. Admin has the ability to add, edit, and delete options.

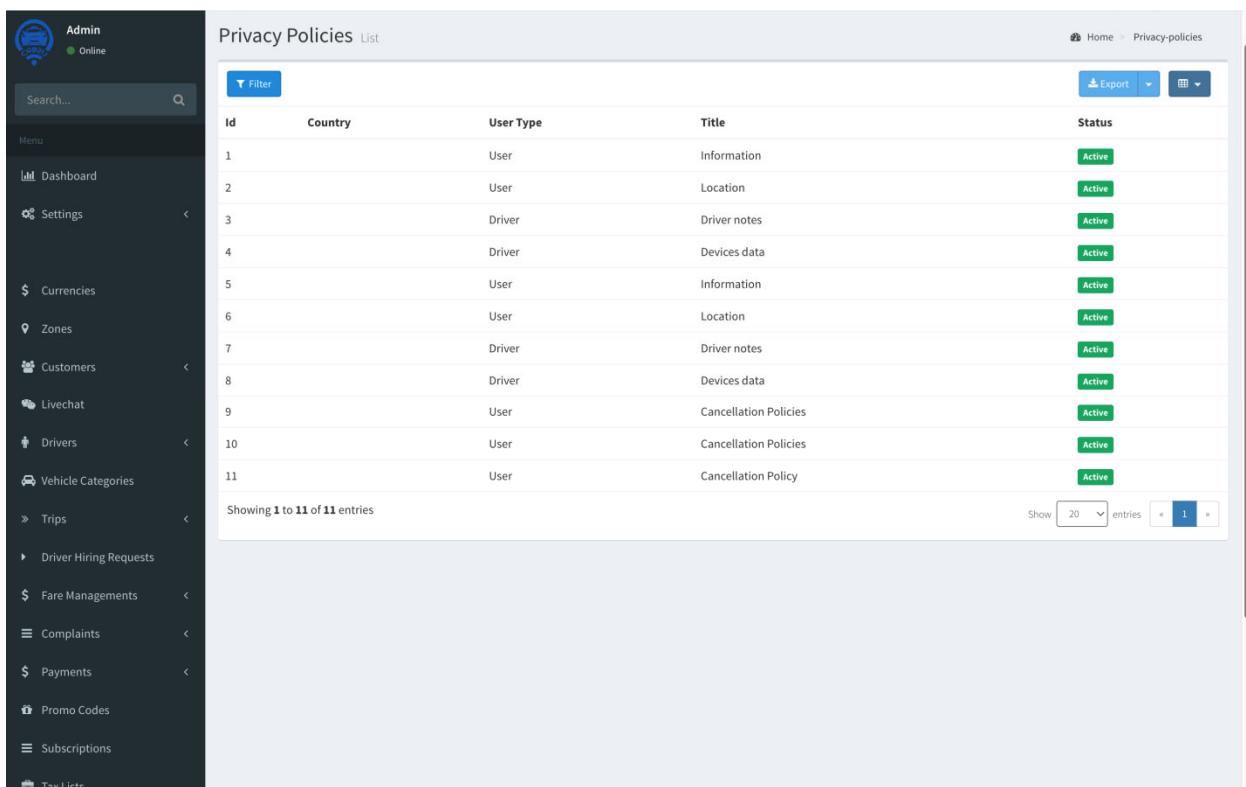

The screenshot shows the Admin interface with a dark sidebar on the left and a light-colored main content area. The sidebar includes a user icon, 'Admin' status ('Online'), a search bar, and a navigation menu with items like Dashboard, Settings, Currencies, Zones, Customers, Livechat, Drivers, Vehicle Categories, Trips, Driver Hiring Requests, Fare Managements, Complaints, Payments, Promo Codes, Subscriptions, and Tax Lists. The main content area is titled 'FAQs List' and contains a table with 9 rows of frequently asked questions and their answers. The columns are 'User Id', 'Type', 'Question', 'Answer', and 'Status'. All questions are from 'User' type and have an 'Active' status. The 'Answer' column contains detailed responses to each question, such as 'What is cancellation fee?' and 'How to track your ride'.

User Id	Type	Question	Answer	Status
1	User	What is cancellation fee?	In Cab2door we appreciate the partners' time and, thus, we always compensate the time spent on the road to the passenger if the trip never took place. In that case, user can be charged with a volume of 40 USD, if:-you cancelled trip more than 5 minutes after you have accepted the request -you are late for more than 5 minutes after driver has arrived at the pickup location, and you didn't contact the driver to let him know about your delay User doesn't charged a cancellation fee, if:-you cancelled trip during first 5 minutes after making request -driver is late for more than 5 minutes (after ETA, which you've accepted while made request) Mention that if you are late, you can notify driver that you are late via call or sms.	Active
2	User	How to change language settings of the app?	Cab2door app automatically sets the language based on the language settings of your device, so in order to change the language of the application, you should change the language settings of your smartphone.	Active
3	User	Do you provide self drive cars?	Sorry, we do not provide self-drive cars. Our driver drives up to your doorstep with the vehicle and drives you around during your entire journey.	Active
4	User	What if my cab shows up late?	We are proud of our on-time performance but sometimes delays do happen. If the nature of your booking is time-sensitive ...involving an airport pickup/drop or meeting at your destination, please budget for additional travel time (usually add 30mins for traffic delays for every 2 hours of estimated travel time) and also let us know of this as a special request when making your reservation. We will make additional efforts to ensure that we're vigilant and ensure a safe & punctual transit for you. If for any case, your cab is delayed and you have to cancel your reservation we will issue a full refund of any payment that you may have made in the form of advance towards the taxi reservation	Active
5	User	What if the cab breaks down during the journey?	All our taxi's are regularly inspected along over 30 different points. However, breakdowns cannot be anticipated and do happen. In those cases, we expediently arrange a backup cab to ensure that your travel plans continue uninterrupted and with the least possible delay.	Active
6	User	Do you provide an English-speaking driver?	We do try our best to provide a English speaking driver if the request is received on your booking under the additional requests section ahead of time. This is generally subject to availability of a English-speaking driver. If you are not a resident of the region, we suggest that you install Google Translate on your phone. Using the apps voice transcription features, you can speak in your native language and the app would translate it into spoken words of the language of your choice.	Active
7	User	How can I get a bill/receipt for my trip?	Invoices are automatically generated and sent to you by email for every trip that you complete with us.	Active
8	Driver	how to enter or change my destinations	You will need to enter your destination before confirming your booking. You can do this by: Entering the address in the 'destination' field at the top of the screen. You can also change your destination during your ride by: Clicking 'Edit' and entering the correct destination	Active
9	Driver	how to track your ride	Once your booking is confirmed, you'll be able to track your ride and see the following details on your app in real time: Your driver's ETA and current location. The driver's route to your pick-up address. The entire route of your ride	Active

PRIVACY POLICIES

It displays information about the privacy policies. Admin has the ability to add, edit, and delete options.

The screenshot shows the 'Privacy Policies' list page within an admin application. The left sidebar contains a navigation menu with various categories like Dashboard, Settings, Currencies, Zones, Customers, Livechat, Drivers, Vehicle Categories, Trips, Driver Hiring Requests, Fare Managements, Complaints, Payments, Promo Codes, Subscriptions, and Tax Lists. The main content area is titled 'Privacy Policies List' and displays a table with 11 entries. The columns are 'Id', 'Country', 'User Type', 'Title', and 'Status'. Each row shows a unique ID, a country (User or Driver), a user type (User or Driver), a title (Information, Location, Driver notes, Devices data, etc.), and a status (Active). At the bottom of the table, it says 'Showing 1 to 11 of 11 entries'. There are also buttons for 'Show 20 entries' and a search bar.
